Mid & East Antrim Borough Council

EIR Reference Number: EIR/079/2526

Date: 13 March 2026

Thank you for your information request received by the Information Governance Team at Mid and East Antrim Borough Council (MEABC) on 23rd March 2026 which has been processed under the Environmental Information Regulations 2004 (EIR).

Your request and our response

we request the following:

A full copy of the PRoW investigation carried out by MEABC Officers (as referenced in Anne Donaghy's 2020 letter)
A full copy (accepting redaction of personal details) of the narrative responses and postcode analysis of the Public Consultation carried out (May-June 2025) in relation to the access to the shore.

This information is regarded as held for the purposes of the Environmental Information Regulations 2004.

Please see the information attached as Appendix 1 to this response.

Raising concerns or making a complaint

If you are dissatisfied with the handling of part of your request, you have the right to ask for an internal review. Internal review requests should be submitted within forty working days of the date of receipt of the response to your original email/letter, and should be sent by email to FOI@midandeastantrim.gov.uk or by post to:

Information Governance Team,
The Braid,
1-29 Bridge Street,
Ballymena,
BT43 5EJ.

Please remember to quote the reference number EIR/079/2526 in any future communications.

If you are not content with the outcome of an internal review, you have the right to apply directly to the Information Commissioner for a decision. You must make your complaint to the ICO within forty working days of you receiving your response or the date of your last contact with the Council.

The Information Commissioner can be contacted at:

Information Commissioner's Office,
Wycliffe House,
Water Lane,
Wilmslow,
Cheshire,
SK9 5AF.

Alternatively, a complaint may be made via the ICO website at:
https://ico.org.uk/make-a-complaint

Please be advised that Mid and East Antrim Borough Council may release the response to this information request into the public domain via our website at:
https://www.midandeastantrim.gov.uk/

If we publish our response to your request, your personal data will be removed to protect your privacy.

Appendix 1

Report Subject:	Report on the alleged Public Right of Way at 87a Shore Road, Greenisland
Publication Status:	Closed
Report by:	Lisa Kirkwood, Outdoor Recreation Officer.
Approved by:	
Report to:	Direct Services Committee
Date:	19th September 2019

1. Purpose of the Report

The purpose of this report is to request SMT approval of investigation findings in to an alleged Public Right of Way (PRoW) at 87a Shore Road, Greenisland.

2. Relevant Background Information

Under the Access to the Countryside (NI) Order 1983, all Councils in Northern Ireland have a duty to "assert, protect, keep open and free from obstruction any public right of way" and yet public rights of way remain one of the most difficult and controversial subjects that a Council will have to address. The purpose of the Mid & East Antrim Borough Council policy is to recommend the basis of a practical, step by step approach that may be taken by Council staff and others who are concerned with the investigation of the status of routes alleged to be public rights of way.

The intention of the policy is to show that Council approaches its statutory responsibilities under the Access to the Countryside (NI) Order 1983 in a fair, balanced and professional manner. The legislation only applies where a public right of way exists.

Council decisions should be made based upon the premise that Council is obliged to assert a public right of way only where it is satisfied that an alleged right of way is in fact a public right of way and that there exists no real dispute as to its status.

A Public Right of Way Investigation Initiation Application Form was received by a member of the public in August 2018. The query relates to a land which runs between the houses of 87 and 89 Shore Road, Greenisland. (see attached map) A new property (87a) was built and both the current occupier and previous owner have locked a gate which prevents access to the slipway at the end of the lane. In a previous attempt to sell the property in 2007, the house was advertised as having a private slipway facility. This was challenged by the then countryside officer, and as a result the house was taken down off the market. It is currently for sale again, but does not describe the slipway as private on the sales brochure.

There have been a number of investigations relating to this alleged PRoW over the years (1995, 1997, 2004, 2007, 2014 and 2017). Some of those alleging it as a public right of way refer to a newspaper article dated 10th March 1993 (see attached). The article refers to walking in Carrickfergus and mentions a number of public rights of

way in the area and when they were asserted. This alleged PRoW is stated as having been asserted on 19th September 1988. There does not appear to be any formal documentation to confirm this.

The deeds for the premises at 87 Shore Road have been made available (see attached) and they refer to the *"a free right of passage on foot only for the occupier of the premises hereby demised over the present existing laneway…. only from the road leading from Belfast to Carrickfergus down to the sea shore for the of said occupier using the said laneway for access the sea shore for the purpose of bathing only."* The deeds for the premises at 87a Shore Road have also been provided (see attached) and they state *"subject to the existing rights of way over the portion of the premises coloured blue on said map leading from the country road to the sea."*

Going by deeds alone it would appear that this is a private right of way and a letter from Mr Trevor Brooks, who owns the freehold, refers to the previously mentioned deeds, stating that the access is private for the land owner and subsequent lease holders.

3. Key Issues/Points

There have been ten evidence forms or letters submitted relating to this alleged PRoW. 8 of them are of the opinion that this is a public right of way and 2 are opposed to it. Those opposed are the current occupier of the adjacent premises and the free holder, who lives a couple of doors down. Of the 8 evidence forms submitted in favour of the PRoW 4 have used it as a means to access the shore on foot for pleasure. The other 4 have never accessed the route and have stated that they know it to be a PRoW on word of mouth from neighbours.

Summary of Recommendation:

The evidence forms submitted are a variety of accounts from people who have lived in the area for many years who believe this laneway is a public right of way and those who suggest that permission was required or that landowners knew it. Those who have lived in the area for short periods of time have found it difficult to access the route themselves, and have been informed by others as to the status of the route rather than coming to this conclusion based on their own experiences. None of the evidence forms state that they have ever been stopped by the adjacent occupier from using the lane to access the slipway

The occupant's deeds, along with deeds on the file from previous investigations clearly state a right of way that exists in order for 87a to access their property and permit 87 and 73 to access the sea shore. That, along with the free holder's definitive response regarding the private status of the lane would suggest that the route is private.

However, the publication of an article in 1993 suggesting that this pathway was accepted as a public right of way by council in 1988, although not documentary evidence is available, would suggest that council at one time felt strongly enough

about this status and allowed this to be published in a newspaper. There is no evidence to show that this was disputed by any of the landowners.

At this stage I am inclined to feel that there is not enough evidence either way to suggest definitively that this is or is not a public right of way.

4. Implications for Council: e.g. Financial, HR, Assets, Equality, Good Relations, Link to Corporate Plan & Rural Proofing

Good relations – If the decision is not to assert there may be some negative comments and publicity as a result of this, given the fact that a few members of the public feel this lane is a public right of way. If the decision is made to assert the PRoW there may be an objection or further action taken by the adjacent land owner. However, council is responsible for investigating the status of any rights of way in a fair and balanced way and has followed its policy and procedures to ensure this.

Financial – No implications if the decision is not to assert. Potential costs if further action is taken by the owner of 87a Shore Road if an assertion is formalised.

5. Recommendation(s)

Given the fact that the evidence is not conclusive it is felt that a decision cannot be made at this time.

6. Attached documents and/or links to other relevant information

CARRICKFERGUS ADVERTISER - Wednesday, 10th March, 1993

Health agency to promote walks in Carrick

THE Health Promotion Agency is to promote Carrickfergus as a good place to go walking.

The Agency is currently co-ordinating the development of a campaign for walking and has asked Carrickfergus Council if they could develop the promotion of walking in this area.

The necessary artwork etc will be carried out by the Health Promotions Agency and provided to Council by the end of March.

Members who were involved in the discussion of Rights of Way in Carrickfergus, at Monday evening's council meeting, agreed wholeheartedly with the Health Promotion Agency's plans.

Of the rights of way already accepted by council Councillor Jim Brown pointed out that Bluefield Lane, which he understood to be a right of way, was not included.

It was also brought up at council that a number of rights of way had been blocked one by barbed wire another due to drainage problems.

Councillor Molly Ardill said: 'It is very important to look after rights of way and to bring to the notice of the appropriate authorities if anyone knows of blockage of rites of way'.

Councillor Stewart Dickson said: 'Where rights of way are violated it should be brought to our attention and we will do the utmost within the law to sort it out.

Recreation Officer, Alan Phair, said that his Department tried to react to any queries they were faced with.

'There is no doubt that in general terms there are lots of rights of way to get asserted by the council.

It will take time', said Mr Phair.

He added: 'Walking as an activity is going to get more important in the future. The Health promotions Agency is developing walking as a means of keeping fit. The Tourist Board is developing it to sell to tourists.

'In terms of getting listed it is not an easy matter we need to take statements from residents to ensure that the right of way has been used for a number of years. It is a lengthy process but worthwhile.

'If the council feels that an enforcement officer could look after this then I would support them in that', he added.

It was agreed that the subject be discussed more fully at the next meeting of the council.

The following rights of way have to date been accepted by council

February 22 1988 - Sloefield Lane; Meadowbank; School Lane, Greenisland; railway path to Kinbayne Crescent, Greenisland; Mullaghmore park to Upper Road, Greenisland; Knockagh Path and Forth Road.

September 19 1988 - Continuation of Hart's Lane (Downshire Road to Loughmourne); Burleigh Lane, North of Prospect Glen and the lane between 87 and 89 Shore Road, Greenisland.

January 23 1989 - York Avenue to Beach Road, Whitehead and Shawfield Lane, Whitehead.

On-going at Present - Information is being sought with regard to the following: Path around Loughmourne Reservoir; Beltoy Road to Dalways Bawn; Island Park to beach, Greenisland; Hartley Cottage to beach, Greenisland; York Avenue to beach, Whitehead; Quay Lane to Beach, Whitehead, Lockharts Lane to beach, Eden.

Newspaper article from 1993.

or thereabouts be all or any of said admeasurements more or less bounded on the North
east on the south west and south east by other property of the Lessors and on the north
west side by the said road leading from Belfast to Carrickfergus and which said
premises are more particularly marked on the map or plan endorsed hereon and
surrounded by a red line with a free right of passage on foot only for the occupier
of the premises hereby demised over the present existing laneway on the north east
side of the Ravenhill property so long as the said laneway shall be continued by
the lessors at its present width and over any other laneway which may be hereafter
substituted for the said existing laneway provided always that such substituted
laneway shall not be less than four feet in width and the entrance thereto to be only
from the road leading from Belfast to Carrickfergus down to the sea shore for the
purpose of said occupier using the said laneway for access to the sea shore for
bathing only together with the rights members easements and appurtenances

MID AND EAST ANTRIM DIRECT SERVICES COMMITTEE

Minutes of Meeting held on Tuesday 9 November 2021 at 6.30pm in the Council Chamber, The Braid, Ballymena and remote access

Chair: Ald N Williams

Present:
Ald S McDonald
Ald W McNeilly
Ald Ms G Mulvenna (via Zoom)
Ald T Nicholl, MBE
Cllr Mrs B Adger, MBE
Cllr M Armstrong
Cllr Mrs C Brownlee (via Zoom)
Cllr M Collins (via Zoom)
Cllr D Donnelly (via Zoom)
Cllr Mrs J Frew
Cllr L Gray (via Zoom) (to 7.34pm)
Cllr J Henry
Cllr C Jamieson
Cllr Mrs M Morrow (via Zoom)
Cllr Mrs A Smyth (via Zoom)
Cllr R Stewart (via Zoom)
Cllr A Wilson

In Attendance:
Ms K Morgan,
Director of Community,
Mr P Thompson (via Zoom)
Acting Chief Executive;
Mr S Holgate (via Zoom)
Head of Neighbourhood Services;
Ms E Smith (via Zoom) (to 7.32pm)
Climate and Sustainability Manager;
Mr S Bailie (via Zoom)
Facility Management and Maintenance Manager;
Mrs L Graham-Metz (via Zoom)
Committee Administrator.

Press: No Members of the Press were in attendance.

Public: No Members of the public were in attendance.

ITEM	MINUTE	ACTION
	WELCOME	
	The Chair welcomed all those present to the meeting.	

Members were reminded that the Meeting was being broadcast live on Council's website.

1 NOTICE OF MEETING

The Notice of Meeting was read by the Director of Community.

2 APOLOGIES

Apologies were received from the Vice Chair Cllr J McKeown and Ald J Carson.

Noted.

3 DECLARATIONS OF INTEREST

Members and Officers were invited to declare any pecuniary and non-pecuniary interests, including gifts and hospitality they may have in respect of items on this Agenda.

There were no declarations of interest received.

4 CONSULTATIONS

4.1 Consultation for the Reduction of Single-Use Plastic Beverage Cups and Food Containers

Tabled and previously circulated – (i) Report; (ii) Appendix 1 - Consultation for the Reduction of Single-Use Plastic; (iii) Appendix 2 - KNIB NI Litter Compositional Analysis 2019; (iv) Appendix 3 - In-scope SUP beverage cups and food containers; and (v) Appendix 4 - KNIB Response to Evidence on Plan to Eliminate Plastic Pollution in NI.

At the request of the Chair, the Climate and Sustainability Manager provided Members with an overview of the report, advising that the consultation sought views on achieving a sustainable reduction in single use beverage cups and food containers. The Climate and Sustainability Manager advised that the carrier bag levy had been very effective in reducing single use plastic bags littering the environment but these had been replaced with takeaway food and drink containers being discarded.

The Climate and Sustainability Manager detailed the scope of the consultation, noting that it included containers filled at the point of sale and highlighted the three policy options outlined within the report which would affect businesses of all sizes, but that the health care sector would be exempt. She informed that NIGLA had met and endorsed the Keep Northern Ireland Beautiful

response, as circulated. In closing, she highlighted that the response noted that levies were a proven solution to achieving behavioural change and the hypothetical income could be used for education to tackle the issue of littering.

The Climate and Sustainability Manager sought Members' approval to endorse the circulated response from Keep Northern Ireland Beautiful.

Cllr Wilson stressed the need to do more to phase out single use plastics and welcomed the proposed option for a levy, noting the recent announcement that the plastic bag levy would increase to 25p in the following year. He accordingly proposed accepting the Officers' recommendation.

On the proposal of Cllr Wilson, seconded by Cllr Mrs Adger it was

Recommended: That Council endorse the Keep Northern Ireland Beautiful consultation response. **PT/ES**

4.2 Northern Ireland Statistics and Research Agency - 2021 Census Outputs Consultation

Tabled and previously circulated – (i) Report; and (ii) Appendix 1 - Draft response to NISRA 2021 Census Outputs Consultation.

The Director of Community advised Members that the report sought approval of the circulated consultation response in relation to NISRA's 2021 Census Outputs.

She welcomed the consultation and highlighted Council's use of the data, particularly in Community Planning, and noted that good data was critical in the heart of decision making.

Cllr Donnelly sought clarification as to why Council did not require any additional output categories access for information on sexual orientation, membership of the UK armed forces, veterans of the UK armed forces or migration. The Director of Community undertook to investigate the matter and provide him with an answer. **KM**

On the proposal of Ald McNeilly, seconded by Cllr Jamieson it was

Recommended: That Council approve the draft Council response to the NISRA 2021 Census Outputs Consultation. **KM**

5 ITEMS FOR CONSIDERATION AND DECISION

5.1 EV Infrastructure

Tabled and previously circulated – (i) Report; (ii) Appendix 1 - NI EV Consortium WG Terms of Reference; (iii) Appendix 2 - Department of Infrastructure Minister Nichola Mallon's Letter to Councils; and (iv) Appendix 3 - EV Charging Points Summary of Guidance.

At the request of the Chair, the Climate and Sustainability Manager guided Members through the circulated report and referred them to a letter from the Minister in relation to funding, which strongly urged Councils to progress an application for the on-street, residential charge point scheme.

The Climate and Sustainability Manager informed that Council was a member of the Northern Ireland EV Consortium Working Group, which planned to submit an application for the above in February 2022. Each Council had been asked to draw up a list of 15 locations within Council-owned car parks for consideration. She detailed the criteria on which the Funder would decide on the suitability of a location.

The Climate and Sustainability Manager advised that ESB updated Council when they replaced broken EV chargers and the report provided an update on this matter.

In closing, the Climate and Sustainability Manager sought approval for the recommendations contained within the report.

In response to Cllr Mrs Adger's request that the chargers already in place be fixed, the Climate and Sustainability Manager informed that any chargers that were not working were reported by Council to ESB, who were responsible for their maintenance, with a request that they fix them. She advised that Council could not control the time taken to respond.

Cllr Mrs Adger expressed her disappointment after she received clarification from the Climate and Sustainability Manager that the chargers in the report under consideration were not fast chargers, as the nearest fast charger to Ballymena was in Londonderry. Cllr Mrs Adger highlighted the problem of more than one person wishing to use the same charger. The Chair asked the Climate and Sustainability Manager to look into this issue. **ES**

Cllr Wilson commented that it may take until the following November for there to be any substantial progress to be made, detailing the steps that were required. He welcomed the upgrading of charging points in Larne and Ballymena and expressed his hope that this would extend to Carrickfergus.

He stressed the need to be involved in the application and requested that, once the 15 locations had been identified, they be circulated to Elected Members. He accordingly proposed to accept the Officers' recommendations. **PT/ES**

Cllr Mrs Morrow sought clarification as to whether there was an app that people seeking EV chargers could use and whether the status of the chargers could be shown on Council's website. **PT/SW** She highlighted that many people were choosing hybrid vehicles over electric vehicles due to concerns in relation to not being able to find a charging point. She expressed concerns in relation to the security aspects of charging points being located within car parks, with people leaving their cars there and the associated walking. She asked whether there would be CCTV cameras covering the charging points. In closing, she suggested lobbying Ministers to propose a grant for people purchasing electric vehicles to install a charging point at their own residence, highlighting the issue that if the numbers of people with electric vehicles increased, the public points would be unable to cope with demand.

The Chair re-iterated Cllr Wilson's request for the 15 locations to be circulated to Elected Members and Cllr Mrs Morrow's request to have the service status of EV chargers on Council's website.

At the request of the Chair, the Climate and Sustainability Manager responded to Cllr Mrs Morrow as follows: that Council could lobby in relation to grants for installation of home charging points via the NI Consortium; **PT/ES** she did not know the situation in relation to cameras but that there was a bigger concern for Council placing charge points on the streets when they did not own the infrastructure. **PT/ES** She highlighted that the Department for Infrastructure should be installing the chargers, however they were releasing funding for others to install them and Council was making use of that option.

Cllr Donnelly commented that most EV owners charged the vehicle at home. He referred to issues raised in Larne when public chargers were not working and informed that there was an app available which advised if the charger was free, noting that it could be frustrating to arrive and find people parked in the space. He looked forward to seeing chargers in residential areas for people who parked on the street. He concurred with

Cllr Mrs Adger's point in relation to slow chargers, noting that several people could use a fast charge point in the same time it took to charge via a slow charger and asked if Council could find out if it could upgrade the proposed locations to fast chargers. He accordingly seconded Cllr Wilson's proposal. **PT/ES**

Cllr Mrs Adger advised that car companies did provide chargers for people to use at their own home but noted that until this was installed, public chargers had to be used and detailed the difficulties she had experienced.

Ald Nicholl stated that the Government was not ready to promote EVs as the infrastructure was inadequate and it should be implemented first. He requested a letter be sent to the Department for Infrastructure to request that fast chargers be installed in strategic areas of Northern Ireland.

Cllrs Wilson and Donnelly were content with Ald Nicholl's amendment.

On the proposal of Cllr Wilson , seconded by Cllr Donnelly it was

Recommended: That Council

(i) note the update on EV infrastructure funding and replacement of fast chargers across the Borough; and

(ii) approve Mid and East Antrim Borough Council to submit 15 car park locations for consideration in the joint Council funding application for OCRS support; and **PT/ES**

(iii) write to the Department for Infrastructure to request that fast chargers be installed in strategic areas of Northern Ireland. **PT/ES**

5.2 Live Here Love Here Campaign Request for Continued Support for 2022 – 2025

Tabled and previously circulated – (i) Report; (ii) Appendix 1 - KNIB Funding Request Letter; and (iii) Appendix 2 - Mid & East Antrim BC LHLH Impact Report Infographic.

The Head of Neighbourhood Services advised that the circulated report sought Members' approval to fund the Live Here Love Here Campaign for the forthcoming three years, at a cost of £20,000 per annum. He detailed the types of work it supported, the other stakeholders involved and referred

Members to the Appendix detailing the projects that had been funded within the Borough.

Cllr Mrs Morrow noted the amount of funding received by the Borough and opined that it was a worthwhile initiative.

On the proposal of Cllr Mrs Adger, seconded by Cllr Mrs Frew it was

Recommended: That Council confirm their continued financial support and participation in this regional initiative, at a cost of £60,000 (£20,000 each year) for 2022- 2025. **PT**

5.3 Ongoing Anti-Social Behaviour in Linn Glen

Tabled and previously circulated – (i) Report; and (ii) Appendix 1 – Photograph.

At the request of the Chair, the Head of Neighbourhood Services provided an overview of the circulated report and detailed the recommendations contained therein. He advised that Officers had been working with the PSNI and other stakeholders in the area to find a solution to the problem. He informed that it was proposed to move the viewing point and re-plant the area with appropriate bushes to provide a barrier between the residents' properties and the pathway leading up the Glen.

The Head of Neighbourhood Services informed of the damage caused by youths in the area which had cost Council £3,500 to repair and advised that the proposed solution shortened the path by approximately 200 metres, which should protect residents from the anti-social behaviour.

Cllr Mrs Smyth, in proposing to accept the Officers' recommendations, noted that the situation was unfortunate but that something needed to be done to protect the residents.

Cllr Mrs Morrow, in seconding the proposal, commented that it was an ongoing issue in the area which had escalated coming into the darker evenings. She remarked that groups of up to 20 or 30 young people were gathering in the park and highlighted associated issues in the surrounding area, including the consumption of alcohol. She requested that lighting be considered at the entrance to the park so that local residents could see if people were gathering. She stated that Council should take responsibility to ensure that something was done and advised that the PSNI were planning to organise a meeting

with residents and community groups. In closing, she seconded Cllr Mrs Smyth's proposal.

In response to Cllr Mrs Morrow's comments in relation to alcohol, Ald McDonald asked if any arrests had been made in the area or any alcohol confiscated.

Cllr Donnelly highlighted similar complaints from local residents, noting that it was a long-standing problem. He commented that the PSNI had increased their patrols in the area due to the variety and number of reported problems. He stated that it was a very serious issue, highlighting the concerns of elderly residents in the area and the potential for injury from the anti-social behaviour. He welcomed the meeting being arranged by the PSNI and stated that he supported the Officers' proposal. In closing, he asked that Council continue to monitor the situation to see if the intervention had any effect and concurred with Cllr Mrs Morrow's suggestion of lighting in the area. **PT/SH**

In response to Ald McDonald's enquiry, the Head of Neighbourhood Services advised that he was unaware of any arrests by the PSNI. He undertook to look into the issue of lighting in the area, particularly at the entrance, to bring back a report on this matter and to speak to local community groups to see if anything could be done to divert the youths from the area. **SH** **SH**

On the proposal of Cllr Mrs Smyth, seconded by Cllr Mrs Morrow it was

Recommended: That Council

(i) note the content of this report; and
(ii) approve the removal of the viewing area. **PT/SH**

5.4 Town Park and Chaine Park Larne

Tabled and previously circulated – Report

The Acting Chief Executive provided Members with an overview of the circulated report and outlined the options. He detailed the funding of the recommended option and sought approval on the way forward.

Cllr Mrs Smyth welcomed the investment in the two parks and proposed acceptance of the Officers' recommendations. She advised of a request she had received from the Larne Running

Club for a running track around this area in the future, as running had increased in popularity due to COVID.

Cllr Donnelly concurred with Cllr Mrs Smyth and sought and received clarification from the Acting Chief Executive that the new toilets would be at a different location and that the existing toilets would be demolished for an area of hardstanding.

Cllr Donnelly confirmed that he was happy to second Cllr Mrs Smyth's proposal as long as the park would not be left without toilet facilities at any point.

On the proposal of Cllr Mrs Smyth, seconded by Cllr Donnelly it was

Recommended: That Council

(i) note the attached draft detailed designs; and
(ii) agree the proposed works as outlined at an estimated cost of £129,000. **PT**

5.5 Mid and East Antrim Borough Council Sports Awards

Tabled and previously circulated – Report.

The Director of Community sought Members' guidance on the way forward for the Mid and East Antrim Borough Sports Awards, following the impact of COVID-19. She outlined the lead-in time for the event, with nominations normally sought in January. She advised that there would normally be 10 categories covering the previous year, however, given the public health restrictions, a lot of sport had not taken place over the previous twelve months. As a result, if the event was given the go ahead, Officers would seek nominations for a 24 month period. She drew to Members' attention that there would normally be a video to capture the sporting and community events over the previous 12 months and this would have to be reduced in scale due to COVID. She noted that any future public health restrictions might impact on the event.

Cllr Wilson proposed that the event be held in March 2022, covering a period of the previous 24 months. Cllr Mrs Adger seconded the proposal.

On the proposal of Cllr Wilson, seconded by Cllr Mrs Adger it was

Recommended: That Council

(i) note the update on the Mid and East Antrim Sports Awards
(ii) plans be taken forward to hold the Mid and East Antrim Sports Awards in March 2022 covering a period of the previous 24 months. **KM**

5.6 Request to use Eden Community Centre

The Chair advised that this item had been withdrawn prior to the meeting.

6 UPDATES FOR MEMBERS

6.1 Operations Update

Tabled and previously circulated – Report.

The Acting Chief Executive informed Members of the ongoing activity across the Operations Directorate and highlighted the following:

- work being undertaken on Climate Change
- the Sullatober HRC ongoing work and the impact of the NIE sub-station on the likely re-opening date and the subsequent need to seek alternative arrangements over the Christmas period;
- the delay on work with the Education Authority and Carrickfergus Grammar School on a new synthetic pitch;
- work with Barn Youth FC in relation to flood lit pitches;
- potential future work with Greenisland FC; and
- MEA United.

Cllr Donnelly highlighted a few items with the Acting Chief Executive, as follows:

- noted the huge amount of work being undertaken;
- welcomed the new anti-litter signage erected near Larne Port;
- highlighted the great difference the Eco Rangers had made in Larne;
- the need to re-visit the opening times for the Recycling Centre in Larne to include Sunday opening; and **PT/SH**
- to investigate a report that the chime at Larne Town Hall sounded "off." **PT**

Noted.

6.2 Parks and Open Spaces Development Team Update

Tabled and previously circulated – Report.

The Director of Community updated Members on the recent work of the Parks and Open Spaces Development team, including the following:

- The launch of a new free library in the People's Park, the fifth in the Borough;
- The achievement of bathing water status at Ballygally, Browns Bay and Carnlough;
- Community Walks within the Borough; and
- Success in the Translink Ulster In Bloom Awards.

Noted.

6.3 Speed Indication Devices Programme

The Director of Community updated Members on the purchase of 7 new speed indication devices, one for each DEA within the Borough. She advised that, to look at where they would be sited, an Interagency Operational Group had been set up to enable Council to link in with specialist road and traffic knowledge of the PSNI and NIFRS. Should Elected Members have a location that they wished to refer to the Group this could be done via the PCSP, as detailed in the report.

She updated on 5 older units which had been returned to the supplier and would be coming back to Council imminently. A number of locations for these had already been identified and the Interagency Group would look at them, with recommendations going to the PCSP for their siting.

The Chair requested that Upper Road in Greenisland be considered as a location once the building work had finished. **KM**

Cllr Mrs Adger commented that the devices were very effective. In response to Cllr Mrs Adger's request for an update, the Director of Community advised that a reply had not been received on the request for signage near the school on the Antrim-Ballymena line and that she would follow up the matter. **KM**

Cllr Wilson asked the Chair to write to the PCSP to consider deployment in the vicinity of Greenisland Golf Club, highlighting a number of recent accidents **KM**

Noted.

6.4 Good Relations Annual Report 2020-21 Executive Summary

Tabled and previously circulated – (i) Report; and (ii) Appendix 1 – Good Relations Annual Report Executive Summary.

The Director of Community advised that the circulated Good Relations Annual Report set out the actions undertaken in the last financial year, highlighting that most targets in the Action Plan had been achieved despite COVID restrictions. She gave credit to the staff involved and thanked Elected Members for their support.

Noted.

7 CORRESPONDENCE

7.1 Email from East Border Region Ltd re FASTER Project

Tabled and previously circulated – Email.

The Acting Chief Executive informed Members that the event was organised by the cross-border Consortium that Council were involved with in relation to EV fast chargers to enable Elected Members find out more about the project.

Noted.

7.2 DAERA - Translink Downshire Sea Defences Repairs

Tabled and previously circulated – (i) Downshire Sea Defences Repair HRA; (ii) Appendix A - Downshire Sea Defence Repair Details; (iii) Downshire Sea Defence Repairs MCZ Assessment; (iv) Downshire Sea Defence Repairs Marine Licence Application Form; and (v) CONSULTEE RESPONSE (FORM) - Consultee Response Sheet – LIVE.

The Acting Chief Executive advised Members that Council were being consulted by DAERA in relation to a Marine Licence, as Translink proposed to undertake work on the railway line near Downshire at the foreshore. The Assets Team were working to clarify the situation and a response would be required as Translink would need to request access across Council owned land.

Noted.

7.3 Department for Infrastructure – Adoption of streets, Farm Lodge Stables, Greenisland

Tabled and previously circulated – Letter.

Noted.

7.4 Department for Infrastructure – Proposal to revoke disabled parking bay – 18a Point Street, Larne

Tabled and previously circulated – (i) Letter; and (ii) Appendix 1 re 18a Point St Larne.

Noted.

7.5 Department for Infrastructure – Proposal to revoke disabled parking bays – 8 & 10 Point Street, Larne

Tabled and previously circulated – (i) Letter; and (ii) Appendix 1 - Re 8 & 10 Point St Larne.

In response to Cllr Mrs Adger's query whether the residents had been consulted in relation to the proposal, the Director of Community advised that her understanding was that the disabled bays were to be relocated and undertook to clarify matters. **KM**

Noted.

7.6 Department for Infrastructure – Relocation of taxi bay, Springwell Street, Ballymena

Tabled and previously circulated – Letter.

Noted.

7.7 Department for Levelling Up, Housing & Communities – Afghanistan Resettlement Programme – 20 October 2021

7.8 Department for Levelling Up, Housing & Communities – Afghanistan Resettlement Programme – 26 October 2021

Tabled and previously circulated – Letters.

The Director of Community took items 7.7 and 7.8 together, referred to the circulated letters and advised Members she would share any further information with them when she was in receipt of same. **KM**

Noted.

7.9 Department of Infrastructure – Commercial Bus Service Permit Renewal Application

Tabled and previously circulated – (i) Letter; (ii) Appendix 1 - Cavehill Coaches - Route Map – Carrickfergus; and (iii) Appendix 2 - Cavehill Coaches - Permit timetables.

The Director of Community sought Members' comments and feedback on the circulated Commercial Bus Service Renewal application.

Noted.

7.10 Commission for Victims and Survivors – Request to present to Committee

Tabled and previously circulated – Letter.

The Chair advised Members of the above request and informed that the Group would present to the Committee in February 2022. **KM/Cttee Admin**

Noted.

8 ITEMS FOR INFORMATION AND NOTING - See Appendix

The Chair drew attention to the seven items for information and noting.

Noted.

RESERVED MATTERS

On the proposal of Ald McNeilly, seconded by Cllr Mrs Frew,

Agreed: That the Meeting goes into 'Reserved Matters'.

In accordance with Council policy, members of the Press and the public were not in attendance for this section of the Meeting.

The Chair reminded Members of the Local Government Code of Conduct for Councillors in relation to the confidentiality of Closed Council.

9 ITEMS FOR CONSIDERATION AND DECISION (contd.)

9.1 Extension of arc21 Waste Contracts

Tabled and previously circulated – Report.

The Head of Neighbourhood Services provided Members with an overview of the report, advising that the contracts allowed for an extension and detailed the situation in relation to the Haulage contract.

On the proposal of Cllr Henry, seconded by Cllr Mrs Adger it was

Recommended: That Council

(i) endorse the arc21 Joint Committee's decisions that the current contract with R Heatricks Ltd for the loading, haulage and transfer of residual municipal, organic, street sweeping and bulky waste be extended until April 2022; **PT/SH**

(ii) approve the current Bring Bank Contracts be extended with the following companies for 1 year from 1 April 2022: a. Lot 1 – Glass – Enva NI Ltd b. Lot 2 – Textiles – Hot Pursuit trading as Cookstown Textile Recyclers c. Lot 3 – Paper – McQuillan Environmental Ltd and d. Lot 4 – Cans – Enva NI Ltd; **PT/SH**

(iii) approve that the revenue share element of the contract in relation to the Textiles be considered in the first quarter of 2022; **PT/SH**

(iv) approve that the contract for the Receipt and Processing of Street Sweepings with Irish Waste Ltd. be extended until 30 April 2022; and **PT/SH**

(v) approve that delegated authority is given to the Council Acting Chief Executive to agree an uplift in prices for the current Haulage Contract of not more than the percentage detailed in the report. **PT/SH**

9.2 Northern Mutual Ltd

Tabled and previously circulated – (i) Report; (ii) Appendix 1 - Northern Mutual Business Case - Executive Summary; and (iii) Appendix 2 - Comparison between mutual and commercial banks.

The Director of Community referred Members to the circulated report which updated on the creation of the Northern Mutual Ltd, a new community bank for Northern Ireland and sought

approval to explore ways Council could assist in its development.

Members raised a number of issues as follows and Officers undertook to follow up, as appropriate:

- the need for presence in the countryside where no banking facilities were available; and **KM**
- the difference between this initiative and Credit Unions. **KM**

In response to a query in relation to the status of a Council Officer's presence on the Advisory Committee, the Director of Community advised that she would seek clarification and suggested an addition to the recommendations within the report.

On the proposal of Cllr Mrs Adger, seconded by Ald Nicholl it was

Recommended: That Council agrees:

(i) to endorse the campaign for the implementation of Northern Mutual Ltd; and **KM**
(ii) for a staff member to join the Advisory Committee if the Bank is in the pre-development stage; and **KM**
(iii) a further report be brought back to Committee in early 2022. **KM**

9.3 Review of Dog Control Orders

Tabled and previously circulated – (i) Report; and (ii) Appendix 1 – Review of Dog Control Orders.

The Director of Community gave a high level overview of the circulated report and sought Members' approval for the recommendation to commence a public consultation in January 2022. She advised that if this was agreed, a report would then be presented to Full Council in March 2022. **KM**

On the proposal of Cllr Henry, seconded by Cllr Donnelly it was

Recommended: That Council:

(i) note the above update; and
(ii) provide approval for Officers to commence a public consultation commencing in January 2022. **KM**

9.4 Public Right of Way Investigation – 87a Shore Road

Tabled and previously circulated – Report.

The Director of Community provided Members with an overview of the circulated report and sought their guidance on the way forward.

Considerable discussion ensued with the following points being raised:

- the need to balance costs and well-being;
- the available method to ensure access;
- the history of the issue; and
- the legal advice provided.

Cllr Henry proposed, in line with the legal advice provided, that Council do not assert a Public Right of Way at this location. Cllr Mrs Adger seconded his proposal.

Cllr Donnelly proposed that Council assert the Public Right of Way. Discussion ensued on the validity of the proposal as it was in direct opposition to Cllr Henry's proposal.

The Chair requested a show of hands in relation to the proposal of Cllr Henry, seconded by Cllr Mrs Adger and voting was as follows:

For	Against	Abstain
10	2	0

On the proposal of Cllr Henry, seconded by Cllr Mrs Adger it was

Recommended: That Council does not progress the legal assertion of a Public Right of Way at this location. **KM**

9.5 Move More Programme

Tabled and previously circulated – Report.

The Director of Community referred to the discussion and decision from the previous month and advised that, as further information had been received, she had received permission at Full Council to refer the matter back to the Committee.

She detailed the additional information received and outlined a number of options.

Members re-iterated their support of the important initiative and, in response to their comments, the Director undertook to ensure that internal staff were trained to supplement the programme and ensure a seamless transition, if needed. **KM**

On the proposal of Cllr Mrs Adger, seconded by Ald Nicholl it was

Recommended: That Council:

(i) note the update on the Move More Programme;
(ii) proceed to make an application for 50% funding to continue participation in the Move More Programme from April 2022. **KM**

10 UPDATES FOR MEMBERS (Contd)

10.1 Arc21 Chief Executive's October Update

Tabled and previously circulated – Email.

The Acting Chief Executive referred Members to the circulated email detailing activity in October 2021.

Noted.

10.2 Mid and East Community Advice Services Performance Update

Tabled and previously circulated – Report.

The Director of Community updated Members on the circulated report and highlighted performance exceeding the KPIs and the level of debt management work being undertaken. She advised of the schedule for re-tendering and of efforts to re-engage with DfC on the model for delivery.

Noted.

10.3 Enforcement of Dog, Litter and Fly tipping Offences – Supplementary Private Contract Pilot

Tabled and previously circulated – (i) Report; and (ii) Appendix 1 - Review of Enforcement Contract.

The Director of Community provided Members with an overview of the 6 month interim review of the Enforcement of Dog, Litter and Fly tipping offences Pilot.

Discussion ensued and the following issues were raised:

- the low proportion of enforcement measures in relation to dog fouling compared to the total;
- the improvement in enforcement of dog fouling;
- the difficulties of catching dog fouling incidents;
- the improvements seen in Larne; and
- The need to reinforce the message that dropping cigarette butts was littering. **KM**

The Director of Community advised that it was a 12-month pilot scheme and asked Members to advise her if they had concerns about a particular area and time, so that she could request enforcement at the relevant place and time. **KM**

Noted.

10.4 Access to Jointure Bay, Greenisland

Tabled and previously circulated – (i) Report; (ii) Appendix 1 - Habitat Risk Assessment August; (iii) Appendix 1a – Map; and (iii) Appendix 2 - DAERA response.

The Director of Community provided Members with an update and suggested a meeting of Members from the DEA to discuss the matter in further detail, once the outstanding information from NI Water was available. **KM**

Members welcomed this option.

Noted.

10.5 Public Rights of Way Investigations and Enquiries

Tabled and previously circulated – Report.

The Director of Community updated Members on the above and advised that an update would be presented to the next meeting of the Committee.

The Chair requested that monthly reports on this issue continue. **KM**

Noted.

OPEN COMMITTEE

On the proposal of the Ald McNeilly, seconded by Ald Nicholl, it was

Agreed: That the Meeting returns to Open Committee.

The Chair reminded Members of the Councillors' Code of Conduct and concluded by thanking Members for their attendance.

The Meeting terminated at 8.19pm.

Are you in favour of pedestrian-only access to Jointure Bay and the Greenisland foreshore?	If yes, can you explain why?	If your answer is no, what concerns do you have about this proposal (e.g., safety, accessibility, environmental impact)?	If you have anything further you wish to inform Council of, please do so below.

No	I believe an arms length body is dumping problems onto the public purse, (Council). The beach already has access that users cherish and the short cut if opened will be expensive to maintain and will change the character of the area to the detriment.	An arms length body (Water Service) has sought to give this path away to council on numerous occasions. They do not permit access siting health & safety reasons. And cost to bring it up to standard. In winter it floods at high tide and is constantly eroding. Cost to council has not properly been discussed. Cost of ongoing maintenance will be a drain on councils limited resources. Council already has sixty two miles of coast line that it finds difficult to maintain, how do we justify spending at this point and not elsewhere. The area has in the past been an anti-social hotspot bringing difficulties to local residents. Opening up this path will bring additional pressure on council to ensure local ratepayers their property, the beach and Lough remains free from litter, drink and or drug parties, loud music and damage to the environment. (illegal dumping) Ownership of the beach has been reported as Councils. In the past I have been told by Council that is not the case. In closing I believe council Officers time would be better spent improving on the rights of way assertions that have and continue to be outstanding particularly in the Carrickfergus area.	I am concerned how short this public consultation is and am not aware of how well advertised it has been. I personally have had trouble finding it on the councils website and wonder how anyone who is not aware of it could happen upon it. This is further exasperated by the fact an Elected member of Mid and East Antrim claimed he had past a five hundred person petition, to get it opened, on to council officers before the membership of the council knew it was to be on the agenda. Having that as a head start, the difficulty in finding the consultation and the short period of time for response, I can only conclude that the consultation process would be heavily skewed to favour a position.

No	I have answered no.	Years ago a resident on the shore front at the bottom or the Station Road allowed free access through their property to the beach and many of the residents were plagued with vandals causing damage to property and houses and sheds were broken into. We had our shed broken into and a rowing boat stolen. Also a window of our house was broken and people got into the house. Luckily they were disturbed and fled. Boys kept coming into the garden to steal apples. Neighbours had items stolen from their gardens. Also dogs are not kept on leads on the beach and they come up and foul in peoples gardens.	This is not a fair survey for the residents. I only found out about it from a poster when I walked along the road today. Most people who live on the sea side of the road don't walk along the road, they walk along the beach and probably have never seen these notices! I WANT MY NAME, ADDRESS AND ANSWERS TO REMAIN PRIVATE AND ARE NOT TO BE PUBLISHED IN ANY FORM.

No	I selected "No" but the form needs some text here.	Environmental impact. Jointure Bay and the Green Island are important sites for wintering birds. The disturbance caused by loose dogs would have a negative impact on these sites (as already happens at the beach at Trooperslane and Loughshore Park). Environmental impact assessment needed here.	

No	No	There is no walk way. The tide comes in and people will be caught out and climb over sea walls. The waves from the stena line have caused problems in the past and will be a danger to the public. Also the area has a lot of different wild life, birds and sea lions which will be disturbed with people walking on the beach making bonfires! And leaving rubbish like they do in Crawfordsburn.	

No	my answer is NO	I live right beside the lane that is proposed to be opened with just a stream separating the two properties and I am going to be the most affected by any decision. 1. The stream during the winter runs high and fast and comes down on the area that is being proposed to build the access. It will cause a health and safety issue if people are trying to get to the beach. 2. There has been an incident where I was threatened by someone who was on the path illegally and I had to call the police. It was a very frightening experience. I have also had people coming right up to my property who have been very intimidating. 3. My husband has Alzheimer's and found the whole experience very frightening and upsetting. Opening up the pathway will only increase the possibility of this happening again. His health and safety is a major concern. 4. NI Water have large maintenance lorries which reverse down the lane. There have been young people lying sunbathing on the lane with ear phones on and may not be aware of a lorry reversing down the lane and the lorry driver may not be able to see them. This pathway is a working access route for NI Water and it would need to be maintained to vehicular traffic standards. 5. I have a letter from NI Water stating that they have a	

		ZERO HEALTH AND SAFETY reasons for allowing the public on the pathway. What is the Council going to put in place that will overcome this Zero health and safety reason? 6. The Save the Shore Campaign have said they have plans to have a large BBQ to celebrate the opening of the lane. Their campaign has gone viral and people from miles away are going to be coming down which will have an adverse effect on the wildlife. Who will police such an event and clean up afterwards so that marine life is protected and protect the properties directly on the shore from possible anti-social behaviour? 7. During adverse weather conditions the path is subject to large waves coming up and over the path. Being part of the bay line, it is extremely dangerous for anyone to walk the path during these conditions with serious safety to life implications. 8. Assess to the ASSI designated bay will encourage jet skis and boats to access the water and will have a very adverse effect on the wildlife. This happened when people were able to access the gate before it was secured. 9. Environmental issues such as bins for control of general waste and dog fouling would need to be put in place as well as extensive signage for wildlife protection. 10. We have watched the seals being disturbed off their basking rocks as dogs off leads run up barking at them and the feeding migrant birds also being disturbed when this happens. Have the Dept of Environment been consulted about this?	

		11. There is considerable erosion on the lane due to the winter storm force winds pounding the shoreline. What are the costs to the Council for doing all this work on the path way? As a shoreline resident we are subject to significant maintenance costs on our sea walls on an ongoing basis so therefore are aware of how costly this upkeep is. Railings and steps will need to be put in place and with the erosion every year it will be a constant cost to upkeep the lane. Access over the stream will also have to be put in place as when it is running fast it is dangerous to cross over on foot. 12. There is also a designated public right of way at 87A Shore Road which the Council refuse to enforce, WHY? There is already a slipway there and easy access to the beach. Why has this right of way not been opened as there wouldn't be the costs that will be associated with the NI Water pathway. There are plenty of other accesses to the beach along the shoreline, Trooperslane and The Cuts at Shorelands are within a 10 minute walk. 13. If the pathway is opened it will need regular cleaning to remove seaweed and alga	

No	.	There is an existing public right of way adjacent to the Waters Edge development which has been blocked by a resident. The council refuses to demand the removal of this obstruction despite it's duty to 'assert, protect, keep open and free from obstruction any public right of way'.	See response in section 9.

No	N/A I think it would be a bad impact on the environment	Safety is a major issue as the garden is directly on the beach I live alone & would feel very vulnerable There is also a lot of different types of birds use the bay & nest in this area The New Foundland geese stop here every year on their migration	

No	not aplicable as i say NO	1. My wall on the shore side, is my responsibilty. Every two or three years we pay a company for underpinning, to keep our wall reinforced and to repair any existing damage that has occurred, due to high tide, and extensive storms. We pay for this expensive work ourselves, to keep our property safe, and secure. We have to do that, as with high tide, we experience the water coming up over our high wall. (we have videos off this, and videos of water up over the path, which we would be happy to share) If you look at the path wall which is in the proposal for opening up to the public, who is looking after this wall right on the shore? There is significant erosion on it now, and it needs considerable amount of money spent on it, who is liable for this? The wall is breaking down, and has large cracks, visible to the eye. It is not safe, on a long-term basis. Who is responsible for this? 2. There is numerous access already to the beach, Troopers Lane, Shorelands, Rhanbouy Park, Loughshore and opposite Belfast High School, which have existed for a long time, which are all SAFE access. So why this one, at 103? There is a designated public right of way at 87A Shore Road, which the Council has refused to open. At 87A there is already a slip way, it is much safer for public access to the beach and would be less costly to open up to public access. This part of the beach is not, a RAMSAR site, as is Jointure Bay. This is just a few “Share the Shore” individuals	8. We have had numerous problems already, with drugs, Syringes and glue bottles on the beach, which shore side residents are lifting and disposing of. This is a safety risk. The animals, wildlife, rare bird life and seal life, are also at risk. This is an International Area of Special Interest – Will the Environment Agency not be concerned about how much more activity will be on the beach. Has the Agency been consulted on this proposal? 9. Two young teenage girls last August, spent a day on the beach sunbathing, drinking and on drugs. (these young girls were not from this area, as I had spoken to them earlier, and had asked them were they staying with any of my neighbours, for a holiday, they said no, they were from Monkstown) this was just on the beach under my wall. After they left with eight teenage lads, who had joined them, who had brought bags off drink, with them, (goodness knows what else) ……to my horror they left their rubbish. They had stuck their syringes still with needles attached into the sand for my beautiful dog to stand on (what could have happened to me, my dog, or the other wildlife, if I hadn’t have found this?) Now ask yourself this, would you like to

		who are enjoying the play, or have “plenty” off time on their hands to keep challenging this. 3. I have access to my property through controlled access, my property isn’t secure from Beach front, so I have had, passed experience off a compromise of my security, of my property from the beach. One example, I returned home from work and found two people (not from the area, as I asked them where they were from) and their dog walking around my house. On asking them what they were doing on private property they replied “we were curious to have a look at your house” I am on my own quite a bit as my husband works away quite a lot, and I was scared after that incident. This played on my mind, and I kept thinking I would be broken into, as they were peering through my window. I have also had items stolen from the shore side off my property whilst we were both at work. With more public access to the beach, it undermines the security of my house. 4. I have had the public tapping my window, after 10 at night, wanting to use the toilet. This is my safe haven and my personal surroundings, they are invading, which is very frightening. 5. People don’t realise the stuff that gets washed up on our beach, when rubbish comes in with the tide, the bay won’t get it back out, as its very shallow, so it is up to us residents on the shore side, to help keep the beach clean. We are filling our bins with findings from the beach. Rubber tyres, plastic bottles, sanitary towels, old fishermen’s coats, pallets, fishing nets, bicycle tyres, disposable barbeques, plastic bags, etc. We don’t want to	experience this antisocial behaviour eight feet from your property? This is a safety risk to me and my family. Who is going to Police this? 10. Antisocial behaviour is already an issue, so this could become more of an issue, as a new hang out, or the Hip place to be. Where are the public going to park? It will encourage parties on the beach, more crowds, noises, all of which will affect the Shore residents, and the wildlife. Having an impact on the value of our homes, our family and our privacy. It would also have a big impact on the special interest for our wildlife, seals, and ducks, as it would be great disturbance for those beautiful creatures on the bay as we as Shore side residents are helping to try and protect. 11. A few years ago, before I went to work, I walked my dog along the beach as the tide was in. (this was before 6am) I got the fright off my life, but then a great joy, as the Male Seal was resting on the tip off the waters edge sitting on the sand. They don’t do that often as I feel it is not a safe place for them. As I got closer, the seal was there because it was trapped with a plastic blanket around his stomach. I was a bit

		live on a dirty beach so we are keeping our environment clean, as best we can. 6. Who is going to control who cleans up the beach with public access leaving their rubbish behind? Lifebuoy or life rings put in place? Tide times, public need to be aware. Bins will need to be in place, and constantly emptied Toilets Lighting There are rats on the beach constantly which is a health hazard. (this will become worse if more rubbish is left on the beach) 7. Steps to beach or a bridge over the river. The river, which is also a safety issue with heavy rain, during the winter Its not safe, and very slippery with algae, and for most of the winter it is fast and full flowing. The constant wear and tear from this water will be very costly to maintain.	scared at the start, I put my dog into the house, and headed back to help the seal. I pulled on the rubber, and the seal rocked back and forth, and quickly the seal was away, to deeper waters. That was rubbish from the bay, that the seal got caught up in. I helped the seal, who basks on the rocks, and comes back each year. This will change with more disturbance and noise. 12. The tide on a normal day comes into around approx. eight feet from my steps, So if public access is allowed I am going to have parties and gatherings within 10 feet off my home, and my safe place. I will need to get more security, fencing, lighting, gates, panic buttons, etc which will be an expense to me, or will Council pay for my security? Why should I have to incur expenses to keep my property safe from public access on the shore? As we know drinking, late night parties etc, people can get abusive, loud, and personalities change. Will I get a tap on the window for use off my toilet? Will I have to experience loud music being played into the early hours of the morning? Share the Shore, have stated on their

			Social media that they will have a big party on the beach when the access is open. Who is going to be responsible to police this or any other gatherings? I presume that the Council understand, the worry the Shore side residents have, if this access is opened. 13. Will I get a reduction on my rates bill for this access being opened and reducing the value of my property as a Shore side resident? Will “Non Shore side “ properties get an increase on their rates to pay for this? MORE ON HARD COPY SENT BY POST TO BE READ THANK YOU

No	Na	Date: 25th May 2025 Planning Department Mid and East Antrim Borough Council Silverwood Business Park 190 Raceview Road Ballymena BT42 4HZ Subject: Objection to Proposed Public Access Opening at Jointure Bay Dear Sir/Madam, I am writing to formally register my objection to the proposed opening of Jointure Bay for public access, which I understand is currently under consideration by Mid and East Antrim Borough Council. While I recognise the value of coastal access and recreational opportunities for the wider community, I believe this specific proposal raises a number of serious concerns that must be addressed: Environmental Impact Jointure Bay is an ecologically sensitive area that supports diverse marine and bird life. Increased footfall and public activity may result in habitat degradation, littering, and disturbance to local wildlife. To my knowledge, no adequate Environmental Impact Assessment has been published to support such a development.	No

		Safety and Infrastructure There is a notable absence of safe and suitable infrastructure to support public access, including proper walkways, signage, and emergency response provisions. The rugged and secluded nature of the bay poses a risk of injury, especially to children or vulnerable visitors. Furthermore, this area is tidal, and the tide comes in extremely quickly. There have been numerous instances of people becoming stranded on the outcrop locally known as the “Greenisland.” This creates a significant health and safety hazard for both children and adults, especially those unfamiliar with the tidal schedule. Without dedicated monitoring, warning systems, or rescue infrastructure, this risk will only increase with higher footfall Traffic and Parking Concerns There are limited parking facilities nearby, which may lead to congestion, illegal parking, and inconvenience for local residents. Privacy and Property Boundaries Opening access at this location risks infringing on the privacy of adjacent properties and may encourage trespassing or anti-social behaviour in what is currently a quiet and privately enjoyed coastal space.	

		Lack of Public Consultation Many local residents, myself included, were unaware of this proposal until recently. I believe that any such initiative should be subject to a more extensive public consultation process, with direct engagement from those most affected. For these reasons, I respectfully urge the council to reconsider this proposal and to prioritise the protection of our local environment, residents' well-being, and responsible coastal management. Yours faithfully, Gary Callaghan	

No		Environment, designated sites, accessibility, maintenance costs, H&S, litter, erosion of access road, ASB, needles etc.	

No		ASB, H&S on boulders and tides, dogs. Environmental due to birds 3. My concerns about the proposal are several. I am advised that residents in the immediate area have hard copy proof of private ownership of the beach in the Jointure Bay, which calls into question the premise of this exercise which is based on new information that Council own the whole beach. As an Elected Member, I want to ensure that we are making decisions based on facts, and I feel this is not the case. The area in question is not a private or public right of way, and I am surprised that Council sees this private access to a beach which is already services by two access points as a priority given the massive backlog across the area to address and assert actual rights of ways. I would strongly question why resources are being thrown at this project, when the access is not owned by Council and the beach is apparently owned privately. It appears the Directorate have their priorities in the wrong place, and I am surprised officer time has been allocated to this without all Knockagh Councillors being aware of the progress and having buy in. In recent correspondence with officers, I was advised that the legacy Borough of Carrickfergus and its boundary has a total of 43 potential PROW's with only 3 asserted and that very few of these are included in the business plan for 2025/26. I would like to know if this access project across NI Water owned land to an area of Jointure Bay, which is under disputed ownership at best, is included in the business plan? If not, why was it brought to Council as a report to recommend opening it up and under whose authority or what political direction was this process	

		initiated to end up on a Council agenda? This concept idea was discussed in the last mandate and wholly rejected by Council. This was due to serious concerns outlined by our legal team in addition to officers around liability, health and safety and cost of repairs to the area in question. Local concern about anti-social behaviour was also highlighted. What has changed?	

No	N/A	Tidal safety risks and rescue concerns The shoreline frontage is tidal, with the water rising twice daily to the full height of the sea wall. This creates a serious hazard, as individuals can become trapped by the incoming tide. Over the years, our family has had to rescue multiple people who were caught unaware by the tide – often with access through our property being the only viable route to safety. We are concerned that increasing public access and activity in the bay and shoreline in question would likely escalate both the frequency and severity of such incidents, particularly given the absence of safety infrastructure and escape routes. Unwarranted given existing council investment Antrim & Newtownabbey Borough Council has invested nearly £3 million to improve nearby Jordanstown Loughshore Park, and in 2023 secured another £2.2 million to further improve provision. This well-established park already provides safe, managed access to the shoreline; ample parking; a café; changing and toilet facilities; and a coastal walkway alongside a wide range of facilities specifically designed to support recreational use and community enjoyment. In contrast, the shoreline currently under discussion has no parking facilities, no public amenities and hazardous tidal conditions unsuitable for public use. It is difficult to understand why the Council would consider promoting or investing in a shoreline location that lacks even the most basic infrastructure. Redirecting attention or resources to this undeveloped and unsafe location is not only impractical, but it also risks	Thank you for giving shoreline residents the opportunity to voice their concerns.

		undermining the significant public investment already made in Jordanstown Loughshore Park while introducing new public safety concerns. Moreover, additional established shoreline access points already exist nearby, including Trooperslane Beach and Burnside Beach – both within walking distance of Jointure Bay. Encouraging activity at an underdeveloped site when safe and suitable alternatives are available seems unnecessary and potentially irresponsible. Environmental and conservation concerns We are aware that the area in question supports a range of special bird and marine species, largely due to its natural seclusion and minimal human disturbance. This stretch of shoreline is recognised for its international and national environmental importance and is already protected under multiple conservation designations: • Ramsar Site (Wetland of International Importance) • Special Protection Area (SPA) under the EU Birds Directive • Area of Special Scientific Interest (ASSI) We are deeply concerned that any increase in public activity, footfall or development could cause irreversible harm to this sensitive ecosystem. Disturbance from increased human presence could displace protected bird species and marine wildlife, directly contradicting the aims of these conservation designations. The ecological integrity of this site should be respected and preserved through continued protection and by maintaining limited access. Lack of historical public access	

		To the best of our knowledge – and in living memory – Jointure Bay and the shoreline in question has never been treated as public, nor has there ever been direct public access to it. This understanding has been consistently shared among local residents over the years. There does not appear to be a clear historical precedent for designating this quiet, environmentally sensitive area as a public access point, leaving us perplexed in light of the environmental, safety and infrastructure concerns that have already been raised.	

No	N/A	I have several concerns about this proposal. 1.Jointure Bay is a Special Protected Area (SPA). There are many directives to conserve this area: * European Directive on the Conservation of Wild Birds 1979. (EU Birds Directive) * EU Directive on Conservation of Natural Habitats, wild flowers & fauna (1992) * Area of Scientific Interest (ASSI) Nationally important wildlife sites protected under law by the Environment (NI) Order 2002. * Marine Conservation Zone (MCZ). These sites are designated for the conservation of marine species & habitats protected under the Marine Act for NI (2013). See Belfast Lough Ramsay Site Map (which protects the above.) 2. From the point of view of Health & Safety Regulations, I have a culvert in my garden, which flows into Jointure Bay. At times the water can be fast flowing, not to mention the waste and dirt that flows down it from time to time. I have lived in my property for nearly two years and to the best of my knowledge no one has called to check it or take water samples. I would be surprised if the water is suitable for public use. 3. As for accessibility to Jointure Bay, I am surprised. Where would cars park? If people are going to stay for any length of time, where would the toilet block go? As for the existing rubbish in Jointure Bay, who will look after the litter etc, that extra traffic and folk would bring to the area, when not far away there is a beautifully appointed	Thank you for your time & I hope this helps the Council make an informed choice.

		area at the Loughshore in Jordanstown. It just beggars belief	

No	N/A	During 40 years of living along the foreshore we have had multiple incidences of antisocial behaviour from non-residents who have gained access to the beach at pre-existing entry points. These have included trespassing from the foreshore, theft and destruction of private property, often accompanied by the use of alcohol. We believe there is already sufficient rights of access at pre-existing entry points and that no further entry points are necessary or desirable in light of our past experiences.	

No	N/A	Health and safety with reference to tides. Environmental and conservation reasons.	

No	n/a	Concerns around anti-social behaviour, youths congregating and consuming alcohol, starting fires and vandalising property. There are also environmental concerns around littering and spray painting walls, along with serious security concerns of people trying to access properties as the area is not covered by street lighting. There are also separate concerns around people's safety, as the beach is obviously tidal and the tide can come in fast, along with waves made by passing boats, not understanding these factors could cause significant harm. There is a major risk of people becoming stranded or drowning if they get caught out.	

No	n/a	Concerns around people's safety, the tide can come in fast. There is therefore significant risk of people becoming stranded or drowning if they get caught out as they do not understand these risks along with waves coming in from passing boats, a huge public liability issue. There is no walk way, as such people could become trapped and then forced to trespass on neighbouring properties, which is likely to cause further issues and confrontation. Issues are also highly likely to arise from antisocial behaviour and general security concerns with the area not benefitting from street lights or being patrolled.	

No	I didn't say yes	Road safety - it would make the road very congested	

No	N/A	There has always been gates on this entrance (2 gates). There is a group of people who will always cause problems. There appears to be a small group of people organising this protest. I have been threatened by people with axes and been threatened with a bomb. They have threatened my on facebook. Police have been informed and told me they have spoke to these people. They know who it is, and said they have spoken to them about other things. These people have been warned. We are both in our 80's and my wife has been verbally abused at our own door. My wife is disabled and has pains in her chest ever since. There is also groups of young men coming down with alcohol and drugs, and throwing empty drink cuos and needles into surrounding gardens. We just want to be left in peace and enjoy our human rights.	

No	I answered NO	What is the reason for this? The access has been closed for over 70 years. How will you ensure that it is pedestrians only? What about property security, will the Council provide some supervision? Public Liability Insurance who is responsible?	Will you respond to my questions? Why are the Council surrendering to the few?

No	The area is too small to ve meaningful without some form of general beach access to Loughshore	My concern is security for the houses that exist in Jointure Bay. To grand public access would possibly compromise those homeowners' security and leave the properties vulnerable to theft or worse. There is also the question of loss of privacy and opening Jointure Bay is too small to be meaningful. There really needs to be a pathway created between Burnside Beach and Loughshore Park. Holywood has such a walk and is extremely popular. As a wheelchair user, I cannot, through lack of access, enjoy a beach "walk" the way that non-disabled do. If opening public access to Jointure Bay was a phase of a scheme to create such a public pathway as described above, then I would support that.	Unfortunately the Council consultation document is sparse with information and detail so we don't even know why the Council is even proposing this. The public need information!

No	No	Antisocial behaviour/ accessibility/no car parking/people being trapped on beach when tide comes in and then using private property to exit	3 access points already available

No	N/A	I am strongly against more access points, there are pedestrian access points each side of the proposed one. Sadly, all too often, they provide stopping places for "teens" to gather - especially during school holidays, away from parental and public view: a safety concern for residences (&council). It will likely impact on benefits of the seclusion of the area environmentally increase footfall. In recent years we have experienced problems with dogs, whose owners seem unable to control them. Several occasions resulting in dogs on our proprty & their owners too & showing no respect.	

NO	N/A	This will increase the number of people believing our driveway is an access; already a proble. People caught on the beach by the tide will come through our garden. If it goes ahead will our rates be reduced.	

No	No	Wildlife is important birds and the seals. It is a Ramsar site and Area of Special Scientific interest. Which means that this part of the beach is protected. If there are too many people going on the beach there will be a problem with rubbish. When it is stormy the waves lash up over the path. Can't we leave a bit of it just for nature and not let people in, there is so much open space in Jordanstown Loughshore.	

No	Na	I am very concerned about the safety of walkers and children getting caught out by rising tides and dangerous rock sections of greenisland which is very slippery as covered in Algae.	The shipping lane coming in and out of Belfast can create unusually large waves and this can and has caught people out again causing danger to the public

No	N/A	Existing Safe Access to the Shore: The are currently a number of safe access points to the shore including Trooperslane, Shorelands, Rhanbuoy Park, Go Petrol Station, Belfast High School and Loughshore, which have been available to the public for many years. The proposed access has never been open to the public. It should be noted that access to the beach at Shorelands is closer than the proposed additional access for residents from Station Road Greenisland. Costs: Providing additional public access at the proposed location will require a considerable amount of council /rate payer's money to be spent. Initially, to prepare the pathway to the beach as the path is not currently in a safe state and ongoing maintenance costs eg What will the ongoing cost to the council /rate payers be for insuring the pathway? What will the cost to the council/rate payers be for the maintenance of the portion of the sea wall adjacent to the proposed new access? Antisocial Behaviour: Antisocial behaviour is already an issue around Jointure Bay as those who are demanding public access to the shore have been trespassing through the grounds of 103 Shore Road for many years to gain access to the shore. Indeed the issue of Public Access has only arisen since the owners of 103 Shore Road have taken measures to block access through their property. Public access at this point could facilitate further antisocial behaviour and could encourage crowds of youths which would have a severe adverse impact on the residents of the homes directly fronting the	

		pathway and those fronting Jointure Bay. Impact on Wildlife: Jointure Bay is a RAMSAR site of special interest and is a quiet haven for a multitude of wildlife species including Grey seals, Geese, Eider Ducks, a wide range of wading birds. Disturbance caused by increased public access to Jointure Bay and the subsequent increase in waste, noise and the previously mentioned antisocial behaviour will have a major adverse effect on the areas currently protected wildlife. NI Water Pumping Station: Access to the pumping station for NI Water vehicles and personnel would be hindered by the proposed public access as the only way to gain vehicular access is to reverse in or out as there is no facility to turn vehicles at the pumping station, this will pose an adverse threat to the public. Health and Safety issues: Providing public access at the proposed location will mean that the lowest point of access to the beach will always be tidal necessitating the public to walk over wet concrete / stones before accessing the sand. It must be noted that the proposed access will necessitate the public traversing the storm drain outfall adjacent to the path which is a major health and safety issue due to extremely strong flow following heavy rain.	

No	N/A	Existing Safe Access to the Shore: The are currently a number of safe access points to the shore including Trooperslane, Shorelands, Rhanbuoy Park, Go Petrol Station, Belfast High School and Loughshore, which have been available to the public for many years. Health and Safety issues: Providing public access at the proposed location will mean that the lowest point of access to the beach will always be tidal necessitating the public to walk over wet concrete / stones before accessing the sand. It must be noted that the proposed access will necessitate the public transversing the storm drain outfall adjacent to the path which is a major health and safety issue due to extremely strong flow following heavy rain.	

No	N/A	The access to the beach is not safe as you have to walk down a steep incline and over rocks and seaweed to get to either the beach at the back of island park or try to get around the corner to the shore road beach . It would expose our back gardens and I worry about home security and privacy and the area attracting groups in summer . Even when the tide is out the beach is very "wet" and not the walk people might imagine . There is a family of seals that come here to birth every summer and I would be concerned about the impact on their wellbeing and placement if there is a lot of people about . We would have people fishing perhaps , cold water swimmers and much more noise . Also from a safety point of view the tide comes on very quickly and it could make for difficulty exiting the beach up the rocks on the side to get back onto the lane . The only dry sandy beach is very small and right up at peoples back gardens . The waves etc in winter winds also makes it dangerous for anyone even walking the small concrete land when the tide is in . I don't think the people who are wanting this really understand the conditions are far from ideal .	

No	No	Strangers flocking to Beach & unauthorised parking... anti-sovial behaviour & illegal consumption of alcohol / drugs etc !!! Crawfordsburn is a prime example of a public beach over-run with teenagers in the good weather & quiet surrounding area's residents are made to feel like prisoners in their own homes	

No	.	Anti social behaviour Safety Security	

No	I am not in favour of this access	This access will bring many non residents to the area and security of the residents and properties would be a concern.	There already is access near Station Road and I see no need for a further access

No	I am not in favour.	My property backs onto the beach and public access would compromise my security and privacy. People might chose to exercise their dogs leading to fouling of the beach.	

No			

No		See Line 3 response	

No		1. I am against pedestrian access to Jointure Bay and the Greenisland foreshore at this proposed location. Access is already available at The Shorelands Roundabout and Trooperslane and I regularly use this access point to walk my dog from my fiancés house in the Shorelands development. Additionally, Council previously decided to not pursue an actual suspected PROW on this section of the beach.	

No		The area of Greenisland foreshore to be served by the propsed access point is not always accessible. The shore is tidal and at periods of high tide the water levels are such that there are no sandy areas available for pedestrian use. Low tide periods occur, at most, twice per day and in wintertime often only once within daylight periods. Furthermore, unless those using the shore are familiar with high and low tide times, it is possible that inexperienced users can be prevetned from getting back to their access point as the rising tide cover all of the sandy areas and reach up to 2-3m up the sea wall. Due to the nature of the coastline the rising tide does not uniformly reach the shore line resulting in some parts of the shore being cut off earlier than others. There have been occasions when fols have been stranded on the sea wall. There have been occasions when we have had to "rescue" folks by letting them through our property when they have become stranded.	From the environmental point of vie many dog owners who currently use the beach let their dogs off the leash, letting them chase and distress sea birds. Additionally seldom do these current users clear up their dog's mess. These issues will be exacerbated with increased usage of the shore. Finally from the environmental viewpoint "Green Island" itself is a sanctuary for sea birds and increased human activity may deteriorate this.

No			

No		The rates of the properties on the shore side of the road are higher. If public access is increased they shouldn't have to pay as much on rates. ASB H&S with people being cut off by the tide and walking through their private property.	

No		Past history of youths drinking and lighting fires on the beach and leaving rubbish.	

Yes	The road is so dangerous especially with small children that a pedestrian access is needed.	Na	

Yes	Residents should not have their access to a beach restricted for little or not good reason	NA	NA

Yes	The seashore is on their doorstep and it is fundamentally wrong that house occupants on one side of the road have frequent access points and those on the other side of the road do not. Secondly one of our relatives was trapped on the beach by an incoming tide because the access point was padlocked. A nasty HSE incident, the ensuing court case and bad publicity	No overt concerns.	NA

	were narrowly avoided.		

Yes	It's a more safer area	Safety accessibility	I take granddaughter down to beach and it's a safer way

Yes	I am lucky enough to live in a place where I can access green and blue spaces, so important for good mental health- I would like to be able to do the same with my family in Greenisland on my weekly visits. Such a shame to have the stunning shoreline with no accessibility.	N/A	

Yes	Access for sea swimming	N/A	

Yes	It’s a beautiful part of the coast	NA	NA

Yes	Sea swimming is a growing pastime in NI with multiple benefits	NA	

Yes	Council owned land paid for with rates. Another beautiful spot to visit.	NA	

Yes	Access to beach walking and the shoreline for healthy exercise	No concerns	

Yes	As a resident I am entitled to access the seafront	N/A	The council should support residents free access to the shore in any development

Yes	Residents should be entitled to access the foreshore	N/A	N/A

Yes	Managed and secure access to our natural amenities is very important fir both recreation and health benefits.	N/A	N/A

Yes	I believe that it would be a brilliant asset to the community. I often find myself feeling jealous of the beach access that our neighbours Holywood have with Crawfordsburn, etc. If we could utilise our natural environment to benefit the community, then why not?	N/A	

Yes	To enable greater access to the great outdoors on our doorstep & to enjoy the shore	.	

Yes	We walk along from Loughshore at low tide but the current access is dangerous	N/A	

Yes	Good safe beach, clean, no strong currents, the public should have access to this for recreational use	N/a - there are no reasonable safety, accessibility or environmental issues around this	

Yes	I love to walk. This would add another great route to follow. I frequently take the train to Carrickfergus and walk back.	No	

Yes	Enjoyment of nature and seascapes	NA	

Yes	For walk and see and watch ships go by.	N/A no concerns	It would be a nice quite spot to access occasionally.

Yes	Good for mental health to have access to the beach for walks.	None	I live beside a lane with access for the public, and it creates a lively atmosphere amongst the community of people who meet for walks and swims etc.

Yes	I believe all those living in the area, and not just those residents who are privileged to have access to the beach, should be entitled to the enjoyment of the natural beauty and history, on our doorstep.	N/A	

Yes	I believe that everyone living in the area, and not just those residents who are privileged to have access to the beach, should be entitled to enjoy the natural beauty, and history of the area.	N/A	

Yes	I believe that everyone living in the area, and not just those residents who are privileged to have access to the beach, should be entitled to enjoy the natural beauty, and history of the area.	N/A	

Yes	It is important for the local community to have easy access to the foreshore	N/a	

Yes	I regularly visit friends who live here and we cannot access the beautiful which is basically across the road from their property. We cannot walk to the beach to enjoy the sea, the wildlife or the views. We used to meet a lot of local community walking dogs on the beach. Surely young families, children and the elderly have an	None	As above

	equal right to enjoy this area in a safe and respectful manner. Improving physical and emotional wellbeing and combating loneliness. I'm sure that this can only create a positive outcome, perhaps encouraging them to take pride in their local area , learn about wildlife and as a community collective, protect and sustain it for future generations.		

	Currently only residents who live on the shore side have unlimited access to the lane way (and N I water allow this)... other original openings to the Bay have sadly unofficially , perhaps illegally been blocked off by some residents (THEY DO NOT OWN THE SHORE , IRRESPECTIVE OF STATUS) . Indeed the shore should be accessible to not only all the		

	residents on the road, but to the public in general. This in my view is discriminatio n !!! . Currently the only way to reach the bay is located at ' The Gut " and at Trooperslane which is too far considering the lane way is on the doorstep. The beach areas at these sites pose difficulties, especially for people with mobility issues as there are a		

	number of rocky areas and pipework to negotiate.. its also impossible to park near by as both have no parking and are on , what is an extremely busy carriageway. Having no entrance / EXIT at Jointure Bay also poses a high risk for those who may be unfortunate to get cut off at high tide, putting lives at risk. Council must bring this disgraceful act of		

	inequality of access to an end . It's time to share the shore !		

Yes	Beautiful beach should be available to access for all	N/a	

Yes	We love to walk especially by the beach as it's good for the soul. It's frustrating the walk stops at the end of Loughshore especially when there's such a lovely beach ahead. It would be good for the areas economy too as it would bring more people to the area.	No concerns as it would be great for the area.	

Yes	The public would greatly benefit from safe access to public spaces. Good for physical and mental health and would enhance what Greenisland has to offer to residents and visitors alike.	My answer was yes at Q8	

Yes	Access to shore	None	

Yes	More choice of walking by the shore	No	

Yes	To enjoy the beach	N/A	

Yes	The foreshore is not privately owned and should be accessible to all	No concerns	

Yes	We often walk the dog along the shore/beach from Loughshore. At times of tide changes access to the beach/road would be very be social for safety of being caught in tides. I understand this is a quiet, private area which is also the benefit of this area, and to preserve its beach, less rubbish etc but with hope it would continue.	Na	

Yes	Jointure Bay and the foreshore from Loughshore Park, Whiteabbey to Troopers Lane is a wonderful asset currently underused due to limited public access. Outside low tide periods, Jointure Bay and the nearby foreshore is inaccessible and even low tides approaching 1 metre prove difficult. If I time the	None	

	tides correctly I can have a really enjoyable walk from Whiteabbey to Jointure Bay but I cannot exit the foreshore at the Carrickfergus end without scrambling over rocks to leave at Troopers Lane. An access point at Jointure Bay would be much safer and could be used by Coastguard/Emergency Services in the event of an incident along the shoreline or		

	at sea. It would also allow access/egress to that part of the shore for an extended period of the tidal cycle.		

Yes	Beach is for all. It will bring in visitors.	N / a	No

Yes	I’m a sea swimmer abd it would be great to have a more accessible swimming spot close to home. Sewage at loughshore unfortunatly.	No issues	No

Yes	this is a right of way that used to be accessed. It should have never have been locked. We live and connect with the sea shore but cant get to it anymore because of a two teir approach to visiting our natural landscapes and shores. If you can afford a house on the shore at greenisland you have taken the rights of everyone else here away. Its good for health and	no. Why are you giving suggested issues such as safety, access and environment?	It would be safer to open this gate and make a new gate if the access to the station is a concern. Yet everyone who lives along there can access it so its obviously not. As ir is people arw accessing this area in other more unsafe ways anyway.

	wellbeing. Beaches should be used and not blocked. There is no reason this should be closed. Share the shore. Children who live in greenisland cant even see the green island it is called after. Its an important part of our local history and natural area.		

Yes	Good idea	No concern	

Yes	Promotes shore access as a seafront town we need to encourage people to have exposure and experience of our seafront.. not enough access already in borough	Zzzzz	No

Yes	So people can have access to a place of beauty	Nap	

Yes	All residents of Carrickfergus and Greenisland have a right to access the foreshore, this site used to be available to the public and it should reopen to future generations.	N/A	N/A

Yes	I enjoy swimming in Belfast Lough , and this would allow access,	Na	Currently we swim at a slipway in jordanstown and part of this has washed away and it is getting worse , eventually we will not be able to use it , unless money is spent on improving it.

Yes	To have access to a local beach for myself and my child	NA	

Yes	Everyone should have access to the shore. It's an amazing place to be and can only be a good thing. It will connect people to their community and the natural world. With the hope of positive impact on individual, community and environmental wellbeing.	People have responsibility to care for themselves and the environment. Issues should be addressed when/if they arise.	

Yes	Access would benefit so many people.	No concerns	

Yes	Access to a public beach should be available to everyone and in an easy way. Currently we cannot get there because the first access is at the roundabout of hartley hall (which is very far) and we would have to walk a long way back (not sure there is access from Carrickfergus after the NI waters facilities but the same reason applies). Houses on the shore	no concern whatsoever	Whatever way you decide to do this, make sure it is actioned in a reasonable time so we can use access to it and not just our children or grandchildren in 30 years!

	side do have access (we can see it) so given nobody else could get there easily they have their own private beach which is rather unfair. A new pair of buildings (for apartments) have just been built (where an old care home used to be) by Hagan but no public access has been done at the same time (unfortunately, a missed opportunity).		

Yes	Safe access to and from jointure bay would add safety to existing facilities as when the tide rises at present there is a danger of getting trapped in jointure bay. And safe access to and from the bay would be essential for use of the open space available at jointure bay by local residents.	None	

Yes	We should have access to the slipway because it is a gate that's there unnecessarily	N/A	N/A

Yes	Love the beach and access required to walk and use area	N/a	Nothing

Yes	It would be nice to access this area more locally and I enjoy walks	None	

Yes	It would be lovely for residents in the area to be able to walk down to the beach. Having an 8 year old daughter, we would definitely see the benefits of being able to access it.	-	

Yes	I have lived here for 6 years & don't have access to this part of the beach which is close to my property. I find it unreasonable that we don't & we should as it's part of my beach & not only favourable to the house's at that side of the road. I feel like I'm being treated like a second class citizen & should be treated equally. This should be shared for all & a public vote should determine	I did not answer no. I want access I want democracy	No thank you

	the answer. I demand democracy!!! !		

Yes	Would entice more around the error to come out for a walk, enjoy what nature has to offer	N/A	N/A

Yes	Walking and similar exercise is important for good mental health. As other access further up the shoreline appears to be closed it's important that access is retained or restored where possible.	None	

Yes	This is a public right of way and public access should be the default	I have no concerns about this proposal and am only writing in this box because of the way this form has been designed	

Yes	I live off a busy main dual carriageway. Access to a beach area for walking would be great.	N/a	N/a

Yes	It would be great for the local residents to avail of it as Carrickfergus and Whiteabbey residents have beach access.	No environmental concerns	

Yes	I think it would be great to be able to access it safely without having a long walk along the shoreline and worrying about the tide coming in.	N/a	

Yes	This is a public owned beach like any other and should be accessible by the public to enjoy. Residents fronting the beach may not like this but it is part & parcel of buying a shoreline property in the UK.	.	How any local councillors can object to opening access defies belief. Almost makes me think they've been lobbied (incentivised?) by shoreline residents. Hmmmmm.

Yes	I would like to be able to enjoy walks on the beach in this area.	N/a	

Yes	Access to the beach for walks away from traffic. Allow dogs to run around off the lead	None - There should be no restricted access	No

Yes	More easily accessible for us than loughshore	Answer is yes	

Yes	I would like the access to be able to walk there with my dog but also to possibly use it for cold water swimming.	I have no concerns about the pedestrian access.	

Yes	We should have access for walking and or swimming at all possible points along the coast.	N/A	

Yes	I enjoy walks. I enjoy walking along that side of the beach when the tide is out and access it via other means which puts my safety at risk. Why should only a limited number of residents have access and be able to use that area as if it is their own private golf driving range? Open access. Now.	I have zero concerns.	-

Yes	It's the only beach in the area with sand and provides a nice area for a walk.	No safety concerns at all and no environmental impact is expected...it's just a beach, like every other along Belfast Lough that are open to the public.	There are a number of public access points to the beach along this stretch of old road from Seapark to the junction of the dual carriageway at the bottom of the Station Rd in Greenisland. These have been blocked by residents illegally who think they own the right of way. When are the council going to enforce their own bye laws to reopen these public rights of way so rate paying, law abiding citizens can avail of the beach which belongs to the country...and not to individuals who think they are above the law? Look at your own council maps to see where these rights of way are and enforce bye laws. Thank you

Yes	Pedestrians should not be unnecessarily prevented from accessing the beach. There is no clear justification for preventing access. Any view presented to the contrary should only be considered as certain residents attempting to protect their private use of public property.	N/A	N/A

Yes	I believe people should be allowed access for public use.	N/A	N/A

Yes	It could enhance accessibility for people of all ages and abilities to physical activity and promote it. It could improve the overall quality of life in Greenisland community, encouraging walking and cycling as alternatives to driving elsewhere to have a walk.	N/A	

Yes	This is a beautiful area that should be accessible for walking and enjoying	No	

Yes	To be able to walk along the beach and to let me children play on beach. Enjoy the scenery. This would benefit my physical and mental health.	N/A	No

Yes	I walk along the shore road and being able to access the beach would be a welcome break from the traffic.	N/a	N/a

Yes	I believe that residents should have access to outside spaces for health and wellbeing. There is little to no access to the shoreline between Jordanstown Loughshore and Carrickfergus . I also believe it is unethical for what should be publicly accessible land to be privately owned and/or restricted by private individuals or	N/a	

	companies. I don’t think the shoreline would become excessively used or negatively impacted environment ally by becoming accessible, as the usage (leisure facilities) would not be the same as Jordanstown Loughshore. Residents who access the shoreline should be responsible for its upkeep and protection.		

Yes	I believe public spaces should be made available to the local community. Access to nature and other outdoor spaces can positively impact mental and physical health. Furthermore, I don't believe these spaces should be owned by private interests. Currently, there's no seaside access between Jordanstown and	.	.

	Carrickfergus.		

Yes	There is no access point currently-the tide is very unpredictable if you are walking along the shore there is no where to get out when the tide comes in. On the other hand, the foreshore is not privately owned however residents are unable to access it because of private individuals	N/a	N/a

Yes	The beach and shoreline should be accessible to all residents of greenisland	Na	

Yes	Encourages fitness and walking	Na	Na

Yes	It would be great for the local community to go for a walk which is very nearby	N/A	

Yes	Beautiful beach spaces should be available for everyone to access. Unfortunately other beaches in the area are not clean and full of debris so access to Jointure Bay would be a long needed addition to the available public spaces in Greenisland/ Carrickfergus.	N/A	

Yes	It would be great for dog walking and reduce car travel down to loughshore	N/a	N/a

Yes	There are a few pedestrian access points to the shore along the shore road but I think one in that particular area would be beneficial and logical as the nearest access point to that road is almost opposite Belfast High School. It would also free up the footfall you get crowded into one small spot.	.	.

Yes	I am a sea swimmer	NA	NA

Yes	My family often walkalong and enjoy the shoreline at Greenisland/ Whiteabbey but have to walk from the Station Road in Greenisland to the access point at Shorelands, or to Loughshore park at Whiteabbey, in order to do so. Both involve long walks at the side of a busy dual carriageway.	N/A	

Yes	We enjoy walking on the shoreline at Greenisland/ Whiteabbey but have to walk from the Station Road in Greenisland to the access point at Shorelands, or to Loughshore park at Whiteabbey, in order to do so. Both involve long walks at the side of a busy dual carriageway, which frightens our dog.	N/A	

Yes	A beach facility would be great for families dogs and walkers. Also local schools could have classes there about beach combing and rock pool creatures. Kayaks could have handyg access to the sea.	None	Too many rights of way are becoming to easily handed over to private ownership

Yes	It will allow right of access to the publci beach for all residents.	No	

Yes	Having initially moved to the Greenisland area in 2010 I lived with young children across the road from this access and then moved locally closer to Greenisland Primary school i firmly believe that this access area could provide so much for local children amd families of Greenisland to safely access a part of the coast close to	.	

	home Eliminating the need to travel by car to the likes of loughshore or Carrickfergus		

Yes	This beach should be enjoyed by everyone in the community—families, walkers, nature lovers, and especially those of us with dogs. I have a dog myself, and the thought of being able to walk safely and directly to the shore for fresh air, exercise, and peaceful time outdoors is deeply meaningful. It would make a world of difference to our quality	.	.

	of life. At the moment, we can only admire the beach from a distance. Many in the area, including myself, would welcome the chance to share the shore respectfully. Good access would not only promote wellbeing, physical activity, and community connection, but also show that the council values the mental and physical		

	health of its residents.		

Yes	I frequently take walks as part of daily exercise and would love to have access to a public beach. I don't understand why there is no way to access this beach despite it being public land.	None.	

Yes	I walk daily this would be a beautiful walk for me to enjoy.	My answer is yes it should be opened	I feel the public should be allowed to enjoy what is there's and a walk way would generate more wildlife and tourism as u have had people who visit the area when I'm out walking ask me why can't I get down to the water/beach and I have to start explaining why it s disgrace that residents have just blocked it what is rightfully the publics

Yes	Better quality of life for local residents	None	NA

Yes	Better quality of life for local residents and for young families- better for children for things to do within walking distance and safer away from main road. There isn't many places near Greenisland to walk without a lot of car traffic and this would add a good option.	N/A	

Yes	Tide is unpredictable, very dangerous if joining the beach at shorelands with the potential of getting stuck far up the old shore road with no exit. The only alternative are private houses/lanes which is trespassing - several of which look questionably public	N/a	Clarity on which lanes/slipways are public along the shore road would be ideal

Yes	Access for walks and exercise	N/A	N/A

Yes	There is no access otherwise to this beautiful section of the beach, it should be open for all not just the shoreside householders	Not applicable	I used to walk this section as a child and a adult before it was closed, with no good reason.

Yes	Important to let everyone benefit from accessing the shore, I have young kids who love going down to the beach at Loughshore. Would be great to have somewhere more local. Could also encourage people to get outdoors locally which will promote health and wellbeing. I also have a dog so would be great to have somewhere to walk him on the shore.	N/A	

Yes	Rights of way are one our most important rights to excess places that we are interested in or entitled to use or excess . These must not be lost and more adde where possible. . It would be a sad day if a few residents where allowed to block this	None	Yes please protect our rights of way or those that are for public excess .

Yes	Nice surrounding to walk for health and well being	N/A	

Yes	Well Greenisland is named after the bit of green land in the lough when the tide is in. The fact the shore is cut off from public access is a crime and the public access should be restored and the beach protected and cared for by the council to ensure private home owners can't gentrify what should have always been public access. Bins, seating and lighting	My answer is Yes. Like any other park or public place council ensures bins,seating, and lighting etc are provided and maintained and the beach cleaned up.	

	should be included as well as signage make this an official public location the council can be proud off.		

Yes	It's public space and should have access to the public restored. It is also an area that is known primarily by locals and can provide a less crowded and vehicle free access to the shore front. It benefits families and young children as a safer space to walk and explore. It's the closest area of shore front to greenisland and could benefit those with reduced or limited mobility.	N/A	Question 8 and 9 are answers to the same initial question but have been given different levels of response guidance. This form is therefore flawed as it has a leading question response for those opposed to the public right of way. Examples should be given for both a yes and no response or none at all. Disappointing from a public consultation perspective.

Yes	I enjoy walking and I also enjoy being out in nature. I often walk down to near the shore but find it frustrating that we can't access the beach safely. I feel the beach should be free to all to enjoy walking along. I also think it would encourage more people to get out walking to enjoy the beach and appreciate the wildlife associated with the lough. It's a	None	

	bonus to be able to access somewhere to walk along that is free from traffic as well.		

Yes	The Greenisland foreshore should be open for all to enjoy and not monopolised by a priveleged few. Having spaces to exercise away from traffic in the area are rare and would clearly benefit the physical and mental health of the population.	N/A	

Yes	Pedestrian access only to reduce carbon footprint to the shore and beach.	None	Access to a place of beauty for all residents.

Yes	The beach area is a lovely section, we found it by accident one day walking from the beach at Carrick to it, we wanted to see the Green Island and was amazed with the hidden gem of a beach area we found, felt such a same that where no a proper access to it.	No	

Yes	Greenisland has almost no access points to the shore except the Gut and reopening the access to Jointure Bay would be a tremendous benefit to the local community. I used to birdwatch from this location and the tower on the foreshore of Sea Park house in my youth. There are very few areas of public open space outside Greenisland Estate and anything that can be done to encourage		

	access to the outdoor spaces should be supported by the Council		

Yes	Right to access a public beach should be available for everyone in the area. Greenisland already suffers from a class divide and this is furthered by a small number of affluent residents exclusively accessing a beach in a village that is becoming ever more populated. With Greenisland now already surrounded by dual carriageways left and right to benefit	N/A	

	other towns this would be a small access to nature restored. I hope to not read more delay tactic outcomes for this proposal.		

Yes	Love walking the shore. Every bit of it that I can access from Rush Pk to Blackhead Path and further. No part of our shore should be denied to the public	Answered yes	

Yes	Being so close to beautiful coastline but not being able to easily access it is a real shame. It would be a wonderful amenity to access and go for walks, taking the opportunity to exercise without needing to get in a car to access the shore. With all the new developments in the area public access rights appear to have been eroded to the detriment of the local area, having clear access	Surely any such concerns could be mitigated / managed.	My name and address should not be published please

	for all locals is better as the shore is a public asset that should be for all to enjoy.		

Yes	to provide safe access for enjoyment of the area.	my answer was yes	

Yes	There is currently little access to the shore and this access would be great to have to enjoy what we have in the area	I would have no concerns	No, nothing further

Yes	Be good for sea swimmers	N/A	

Yes	Pedestrian access would further enhance enjoying walks on the beach in Greenisland for too long we have had to travel to carrick or jordanstown to access these places. There is other public access on different parts of the shore road. This should be no different	None	None

Yes	I love to walk and I love to swim in the sea. I miss being able to get access to a beach at Greenisland. I feel like the beach belongs to us all and it seems unfair we cannot get to it to enjoy it.	N/a	

Yes	It would be nice to able to access the beach for walks and for the children to play.	N/a	

Yes	This is a public amenity which has previously and should again be open to the public and will bring much pleasure to those who can access the shore and coastline at this point. To open it would be consistent with the Council's ambition of making the borough a better place to live and a place to enjoy recreation.	N/A	MEABC has a legal duty (through the Access to the Countryside (NI) Order 1983) the to keep rights of way open and it has failed to do so. I would hope the Council will do so in this case without the need for legal action to force this issue. There are other rights of way in the area, eg Bates Way in lower Greenisland, which should also be open. Regrettably, in that case, it is now becoming blocked and overgrown because the Council is failing to keep it clear. It should be covered in gravel and the gate opened permanently for pedestrian only access.

	The people who live close to the shore at Jointure Bay bought property in the full knowledge that there is a right of way to access the beach, and cannot now claim that in would be a unacceptable new development to re-open it.		

Yes	Nature should be enjoyed by all.	My only concern would be the unruly few destroying it for others.	

Yes	It would be great to have an option to go for a walk somewhere nice without a car as there are no big parks within a walking distance.	No concerns.	

Yes	It is a public beach so there should be easier access and it will encourage people to get out of their house as the beach is closer to them rather than having to get in their car and drive. It will also help with mental health, peoples physical health will be improved and it can help with students concentratio n which will help overall academic performances	N/A	N/A

Yes	I walk down Old Shore Road and accessing the beach would be a great addition to my walks	N/A	

Yes	Our shoreline is lovely and so good for our mental health, everyone should have access to it not just those fortunate enough to have garden access	NA	The shoreline is public and noone should have a right to claim it as theirs

Yes	If you are walking from the shorelands access to the foreshore towards Carrickfergus , there is no access off the foreshore until seapark. This poses a safety risk should the tide come in, so an additional access from Jointure bay makes sense. Accessxto jointure bay will also will allow for a shorter walk option.	N/A	

Yes	The shoreline should be accessible to all	N/A	There is an uninsured car abandoned outside my house for a few weeks now. The owner lives in Kinbayne Crescent Greenisland, however as he has no room to park it as his own door, he's decided to abandon his uninsured car outside mine instead. This means I have trouble parking outside my own house, especially when Greenisland FC have matches on. Elaine Clark from Mid & East Antrim Council has previously made contact with the vehicle owner, however as the vehicle is not insured then it should not be allowed to be left on the road and needs removed.

Yes	Nice to avail of access in good weather	Nothing	

Yes	The council should adhere to their duty of protecting and asserting public rights of way	N/A	N/A

Yes	This is a great stretch of beach - allow for dog walking and children playing; also is access to The Green Island	-	

Yes	Lovely walk	None	None

Yes	Because it is needed for local comunity.	I have no concerns.	

Yes	We deserve to have access to the beach, it should be shared by everyone that lives in Greenisland.	None	No

Yes	For people you who drive. It's a long distance to walk for beach access	N/a	

Yes	I enjoy walking for health benefits especially on the coast. Access is essential, it's limited in the Greenisland area.	No	No.

Yes	It is a beautiful calm space be in nature, and enjoy the fresh air away from the noise of the traffic. To exercise, decompress, increase happy hormones and improve overall quality of life and wellbeing.	No	Please do not change it or turn it into the Newtownabbey Loughshore, keep it natural.

Yes	It's a lovely beach to walk my dog away from the traffic.	No	No

Yes	There isn't currently enough access to the beautiful beach, which should be available to all. I frequently walk on the beach but it is difficult go far because of the tides. If the tide is coming in the distance between the current public access points is too great and it can become dangerous with the possibility of being trapped by the tide. Having this extra access	No concerns. Public access here will be safer for all who walk on the beach	

	will make it much safer. I already walk on the beach but this would enable me to walk further, more safely, and it is simply not fair to restrict access when the beach is public land		

Yes	Access for the dog, nicer walks and scenery without having to travel further to reach the coastline	N/A	

Yes	I had it as a child and right up to Teenage years . the pump house path in them day was open you just walked down . All so helped the people who lived the to tidy up the gardens and orchards. well they gave you 10 bob for Saturday morning work .That was before the road was widened. Greenisland Park was not build then .Well there was one house there .	yes	Yes many happy memories from them walks also met a lot off the residents off the Shore Road .As most off them had there own slipways for there own boats . Also walked from the gut to Lough Shore was just getting built then . And Whitehouse Boat Club Building it new club at the pump house . the lane facing the lane up the side off Belfast High School . (lost most of my photos from that era) and most off the other people who were there are now dead .

	Also play in home made canoes that wee made . also fished at the end off the Tower the were plenty of place and pollock about in them days . and Mackerel in season .and also used to go down through Seapark House . Drive . Is the foundations still there from the Anti-Aircraft Gun placement . last seen 1990 on the walks from Greenisland Gut .picking		

	you tide . 2 hours before low tide was the best time .		

Yes	I often walk with my 2.5 y.o. daughter along that stretch of road - it feels very safe to walk with a pram as there are so few cars. We hate that we can only glimpse the sea between houses or through wire fencing at the bottom of Island Park. She always asks to go to the beach. It's so close yet completely inaccessible along that stretch of road. My daughter loves to	Not applicable.	

	splash in the water and look for seals (which we see if we drive to Lough Shore). We would love to be able to access the Bay. I'm also a regular sea swimmer in the lough (I usually access via the slipway at Jordanstown - though there is often barbed wire/glass caught in the rocks) so as a nice sheltered cove I imagine the Bay could offer a nice		

	swimming spot where the water could be accessed more safely.		

Yes	I think it's a tremendous resource and with the huge increase in cold water swimming especially among older adults good access should be a council priority in fact I'm surprised it isn't	My answer was yes ??	Beaches in general in the carrickfergus and Greenisland areas are generally poorly kept this must change

Yes	At one time in the past it was possible to access the beach . And the river mouth . I often used to walk the dog down to the sand for a run . I miss it .	N/A	I think folk who line along the front like to think they own the beach . I understand they want privacy as they have no fence in order to enjoy the view . But I also liked to enjoy the view and a short walk . It's not as if crowds or disruptive people were down .. it's a nice safe and quiet walk along the old shore road and it would be nice to get down to the beach for a while before heading home again ..

Yes	It's a beautiful space that we cannot at this stage enjoy, and haven't been since I have lived in the area.	N/A	

Yes	I feel local residents should have easy access to our beautiful shore front.	N/A	

Yes	Beautiful bay which should be available to the public to appreciate.	.	.

Yes	A great place to walk - other than main roads, Greenisland doesn't really have any other walks. Main roads are not safe for young children, so it means we have to drive out of Greenisland to find somewhere where the kids can run freely, for example Lough shore park. Direct access to the beach would be incredible for us and our kids, and something we would use	No concerns at all	

	daily if at all possible.		

Yes	I have young children and there is no safe off road walk nearby without using a car to get to it so this would be very beneficial to us as a family	N/A	N/A

Yes	I live on the Shore Road and regularly walk with my family in the area. It would be lovely to enjoy the beach area close to home	Only concern is to ensure no antisocial behaviour	

Yes	Watching seabirds and shore life is very relaxing. It would be nice to keep the shoreline clean and environment ally friendly for wildlife and birds.	No	None

Yes	Walking along a beach is great for health and wellbeing, especially for mental health.	No	None

Yes	We can see the sea and shore as we walk so it would be wonderful to walk the shoreline with dogs and children and see the birds and wildlife more closely.	No	None

Yes	We live on the other side of the road and currently don’t have access. It is a right of way and should be open to all local residents. It is within our rights to have access to the shore.	N/A	

Yes	I strongly support maintaining and enhancing public access to the beach at Greenisand. I have lived in this area all of my life and accessed the shore as a child with my parents via old previously established rights-of-way. Access in those days was a longstanding tradition and a vital resource for the physical and mental well-being of the local	The main safety concerns are the risks involved in not providing multiple access and egress points along our shoreline!	I often walk along the Co. Down coastline and honestly wish this joy could be replicated on my doorstep, as it was in my childhood. It is very difficult to comprehend exactly why local families cannot simply and safely opt to have a dander along our beach. There honestly is no valid arguement. The situation that has evolved, whereby agress points have been blocked or gated off should never have been permitted in the first place. I trust that our councillors will do the right thing by the constituents of this wonderful area. It is a real win-win!

	community. Particularly in the days before cars and foreign travel were commonplace. These fond memories echoed significantly with me when we were all at home during the pandemic and could not easily access our local shoreline to just breathe. Previously, the beach was always accessible but never busy nor problematic. It fostered a sense of community,		

	which has now been eroded, the lack of access isolating neighbours who would have enjoyed the odd stroll. Moreover, having a safe, direct route to and from the beach is critical, especially as tides can rise quickly. Easy access and egress points can help prevent dangerous situations for beachgoers who might otherwise be cut off by the		

	sea. People already access the beach at Trooperslane and at Shorelands and walk along past the Green Island. We need to be very measured and cautious when walking along the beach nowadays. During the pandemic, my daughter and her two friends were caught out by the tide. This was really distressing for the girls (and parents).		

	Something we didn't have to worry about in the past. Situations like this could be easily remedied by re-establishing the various access and egress points that seem to have disappeared over the years. Local ratepayers help fund the upkeep of these public spaces and therefore have a rightful claim to continue using them.		

	Some residents have free, unrestricted access and egress but the situation is not equitable for all ratepayers.Ensuring access supports community cohesion, promotes outdoor activity, and enhances our quality of life. Blocking these previous rights-of-way is a loss for the entire area and undermines the principles of public benefit and		

	shared natural heritage. Walking along the shore offers residents a peaceful, natural environment to enjoy fresh air, exercise, and a break from the stresses of daily life. The area is home to stunning wildlife, including seals gulls, herons and geese, which are a joy to observe and provide educational and recreational value for		

	families and nature lovers alike. Preserving access allows people to experience and appreciate this rich biodiversity.		

Yes	Yes, of course. It does not make sense that we can walk along the shore from Hazelbank, Loughshore, the gut to Trooperslane , but cannot get off the beach if needed for safety due to the tide, or indeed, for any reason, without asking to come through a neighbour's garden. It means walks need to be carefully planned.	I do not have any issues with this proposal and welcome reinstating beach access. I am surprised there hasn't been anything done by the Council to rectify this situation before now. It's hard to understand why some residents can utilise certain access points and others cannot.	I feel that the decision to open up access points is the safe, sensible, equitable and best thing to do. All local ratepayers deserve to experience the health benefits of this beautiful shoreline without worry or concern about getting off the beach.

Yes	I recently completed my dissertation on the importance of walking in nature, particularly access to blue and green spaces. I am passionate about the natural environment and regularly walk on our beautiful beach at Greenisland. It is on my doorstep, I do not understand the lack of access and egress points and have been caught out by the	I did not answer 'no' to the first question. I deeply support access to the beach at Greenisland but as this particular question is asterixed it requires an answer... The health and well-being of our local community can only be enhanced by having safe access to and from our beach at Greenisland. There is strong evidence to support the benefit of access to nature in reducing stress and promoting wellness in communities.	The current denial of access to our shore is a poor reflection on our Council's support of constituents' health and well-being. Our beautiful natural shoreline environment hosts many species of birds and sea life. It is our collective responsibility to promote community, safety and residents' rights. Please #ShareTheShore!

	rising tide in the past, which was frightening. Currently, this is a risk, and as there are a few obvious access and exit points along this stretch of beach, it just isn't logical that local ratepayers cannot avail of these (and not solely Jointure Bay).		

Yes	The lane adjacent to 87 Shore Road was ALWAYS a RoWay - it was where all the families and kids (i have just counted 37 of us!) went to play& swim, no matter what the weather. It was also the point of entry for vehicles/contractors etc to enable all the battery walls along the shoreline to be maintained. That facility has, it seems, been removed from all the	Health/safety/well-being - open the access	Answered above - Health / safety/ well-being - all are obvious

	residents because a “blow-in” erected a gate & threatened people when they objected. He knows full well it is not “his” alone, but belongs to the borough. However, despite me speaking many years ago to Stephen Day, a council employee, about the RoW, nothing was ever done. I and others, have filled in forms in the past about the matter.		

	Unfortunately in the meantime, those who knew the situation have passed away. So, yes, access is badly, and urgentky needed. A friend & I got stuck one day the tide cane in and we gad to vlimb a wall and shout til someone came to help us! Rosemary Kerr& her dog also got stuck. Sadly Rosemary drowned at Islandmagee a couple of years ago - she was a sea swimmer and		

	it was not possible to access the Greenisland beach, otherwise she may still have been with us! I would add that there is absolutely nowhere to walk here in Greenisland, except adjacent to roads. PLEASE CREATE THE ACCESS - and also reconsider opening the original RoW at nr 87 - the tide cuts folk off at the island so 2nd access required!		

Yes	The beach at Greenisland is beautiful and offers a lovely walk for everyone in the Shore Road area, and the fact that it isn't open to the public means people in Greenisland are missing out on this. I believe that there is no reason why the beach should not be accessible by the public, and that it is an area that everyone in the Shore Road should have the right to enjoy.	N/a	

Yes	Buckle up - this is long! I *very strongly* wish to see safe reliable access to our shore restored to the families and ratepayers of Greenisland. Here are some reasons why I and dozens of my neighbours have been fighting for this blockade for years, and why we won't give up: 1. HEALTH & RECREATION Outdoor exercise is of proven benefit to	I anticipate some residents, who live on the shore side, and currently enjoy unfettered access to Council property, will be happy with the status quo, and would not like to share the shore. They are likely to raise some issues which the other residents and families would strongly rebut. Here are a few - there may be others - but the proclivities and perceived privileges of the few should not be allowed to overrule the wellbeing, rights and the arguments of the many. 1. Antisocial behaviour, noise & crime: if we open access, thugs and louts will loiter, congregate, make noise, damage private, council & NIW property, and potentially commit crimes. RESPONSE: There is ZERO evidence of this being the case right now (when antisocial elements could easily jump fences etc), and if anything, local residents having access means that we can look out for each other and report antisocial behaviour, so this argument is not only weak, but the counter-argument is much stronger. Eyes on the beach will reduce the risks. (It could be argued that blocking access is the true antisocial behaviour here). 2. Safety: slippery rocks, tidal pinch points, wash from the ferries, pollution etc put people at risk: RESPONSE: opening access means people can get FROM the beach as well as TO it, meaning they are much less likely to get cut off. It also means that in an emergency, it's much easier to alert the authorities and for help to be delivered on the beach. Pollution events will be detected *earlier* and therefore mitigated. So this counter-argument is invalid. Indeed, if it were considered valid, the logic would be to close off the entire shore of Northern Ireland, which is	I have placed some material on a Github web page here: https://github.com/shanemuk/carrickways/blob/main/meabc_sharetheshore.md I have also been posting a fair bit on multiple social media platforms using the #ShareTheShore hashtag. We have a potential win-win here - let's make this happen. The above is quite impassioned, and I hope it communicates the strength of feeling around this - I have neighbours talking to me every day about this. We, the families who live along the Shore Road, are incredibly grateful to the Councillors, Officers and MLAs from many different political perspectives who have supported us over the years and who share our desire to benefit the people and townscape of Greenisland. I am very happy to address Council or participate in any other events in relation to this - contact details above. Thank you!

	physical and mental health. Walking and paddling on our beach is the perfect antidote to stress, and allows us to fill up our lungs with fresh sea air, while getting as energetic (or not) as we wish. Kids can play and learn in a safe beautiful environment that is available to all ages and abilities, provided the tide and the weather are right. 2. SAFETY	clearly bonkers. 3. Environmental damage from lots of people accessing the beach: RESPONSE: The Habitat Regulations Assessment referenced above https://github.com/shanemuk/carrickways/blob/main/Green_Island_Belfast_Lough_HRA_August_2021_Redacted.pdf concluded that there would NOT be any significant negative impact of opening access. As mentioned above, residents are motivated to keep our (*our*) Council beach clean. 4. Property valuation would fall: RESPONSE: It is not credible that property valuation would be adversely affected in any way. This is a non-argument. 5. Parking & traffic would increase: RESPONSE: Anyone driving a car will most likely proceed to Loughshore, where there is good parking available, along with other amenities. It is not credible that opening access will result in a large increase in traffic. Any illegal parking can be dealt with in line with existing legislation and processes. 6. There is already access at Shorelands ("The Gut") and Trooperslane/Torytown: RESPONSE - there is >2km between these points, and the area of beach around Jointure Bay and the Green Island is only accessible at very low tide from these directions, for a very short period. This is NOT adequate, and CANNOT be considered a valid argument against restoring access at Island Park/Jointure Bay.	

	At present, all access points to and from the beach are blocked along a distance of over 2km from Shorelands ("The Gut") to Torytown (Trooperslane). There are several tidal pinchpoints along this stretch, meaning that people who start out walking from one direction risk being cut off by the tide. This is an unacceptable situation, and in addition to	CONCLUSION: The above potential counter-arguments are completely refuted, and we the residents and ratepayers would be happy to analyse any additional "no" arguments, and are pretty certain we can refute them also. It should NOT be accepted as default that access be denied for 2km of beach - there MUST be a strong positive case in order to overrule the rights of the majority of families who live in Greenisland and along the Shore Road.	

	the basic public safety aspects, places the Council in a position of liability. An access point close to Jointure Bay or Island Park would considerably mitigate this risk, as well as permit regular safety assessments by Council personnel. Overall, however, it's a very safe stretch of shoreline. 3. ENVIRONMENT A recent evidence-		

	based Habitat Regulations Assessment carried out for the Department of Infrastructure, looking at potential impact on birds on the Green Island concluded that there would not be any adverse environmental impact of opening access. We argue that, on the contrary, access would be highly beneficial, since residents have an interest in		

	protecting their environment, and would be motivated to organise beach clean-ups and other activities that will preserve, protect and enhance the shore, without generally incurring any cost to Council. It's a win-win. 4. COMMUNITY As a community, we want to make Greenisland somewhere we can be proud of, whether we		

	live on the Shore Road, the Top Road or off the Station Road. The beach is a perfect place for people to see each other in a relaxed, informal surrounding, and really appreciate where we live. Access helps us look out for our neighbours, and considerably reduce the risks of crime or antisocial behaviour. But it's more than that. The Green Island gives our village its name - it is		

	by definition an indispensable part of our townscape character, and the shore should be accessible to everyone. Just because it's accessible to everyone, that doesn't mean everyone is going to be on the beach all the time. One of the great things about the beach is that it is so quiet and relatively undisturbed. Even with secured access, however, it is very unlikely		

	that large numbers of people will visit at any one time, so the prospect of neighbours being inconvenienced by big crowds is very remote indeed, and cannot be considered a valid objection. 5. RIGHTS There is also the issue of basic rights. This beach is owned by the Council between the high and low mean tidal reaches from Shorelands to Kilroot. We the residents		

	are ratepayers to MEABC. It is a violation both of our rights under the Access to the Countryside Order 1983 and our general rights as ratepayers that some residents who happen to live adjacent to the shore have unfettered access to Council property, while families who live just metres away (and who used to have access before		

	rampant development, increased traffic and gating-off effectively removed their access) don't. It is time that all residents (and Council staff) had their rightful access restored. CONCLUSION The Council-owned beach is a fantastic asset to MEABC. We love it, we want to care for it and enjoy it, and we're fed up having to climb gates and trespass to get onto		

	it. There is an opportunity here to right a historic wrong and get real value from this natural asset.		

Yes	I would love to be able to walk my dog on the beach! As it is I can't access the shore at all - the gate is too high for me, and yeah I could go to Loughshore or to The Gut at Shorelands or to Trooperslane , but a trip of a kilometre in each direction along a (let's be honest) not massively attractive road even before I can get onto the sand is pretty crazy. I feel sorry for the old people	There is NO good argument for keeping families and local residents from accessing the beach.	Our older residents remember being able to access the beach at Island Park, the NI Water gate and 87A Shore Road before all these were gated off. Ideally all three should be open again.

	and kids for whom a long trek isn't really an option - yet they live 50 yards from the actual beach. Our community *want* to keep this beach clean, secure, safe and protected. That can't happen if we continue to be denied access. Older residents remember being able to access at Island Park and 103 Shore Road for the Tall Ships in the 1990s before we moved		

	here. What ever happened to "Once a highway, always a highway"? Please give our community our access back - for our physical & mental health, the environment, security and community cohesion. Thanks		

Yes	This is literally a stones throw from our front door and we have been denied safe public access to it since we moved here. It should never have been closed off in this way by Northern Ireland Water, and the council appear to have been negligent in letting this happen. We were fortunate, in that my daughter rented a couple of properties	N/a	I would also question the situation at the bottom of Island Park.

	with access to this beach for a couple of years. It had such a positive effect on our lives for that period. It is unfair the way the rest of us ratepayers have been denied this natural beauty and headspace.		

Yes	I live in the area and it is unbelievable that, as residents, we have no access to the shore that we can see from our houses.	N/A	I believe that there is no good reason for the shore to be off limits to the people that live here. It is an asset to the area, and to our community. Thank you for actually consulting with the people that opening it will affect.

Yes	Nature has so many benefits for people's physical and mental health, and having access to the shoreline that is virtually on our doorstep would be give us a new place to experience nature, to walk and enjoy all year round. A greater sense of connection to nature also increases people's desire to look after nature, so could have positive environment	N/A	I would like to draw attention to the leading nature of the questions above. Question 8 about why access should be implemented gives no examples of the reasons why, whereas Question 9 about what concerns people might have about the proposal gives examples for people to draw upon in their answers, suggesting the council are already leaning in one direction on their decision prior to the public consultation.

	al benefits in the long term. Personally, walking on the beach brings me a real sense of calm and boosts my wellbeing, and I would like my son to have that opportunity too - to enjoy the bay, experience the outdoors, and also learn about the sea - especially when we live so close by. While this part of the Shore Road is well-located for public transport		

	links in both directions - and the street itself is lovely and quiet - residents looking to access green or blue space away from traffic are currently limited to walking along a busy road in either direction (not ideal with a dog or with small children), on a shared pedestrian / cycle path, or have to get in the car and drive somewhere else - despite the shore being within		

	touching distance. While I understand arguments could be made about public safety due to the tides etc. on that bit of shoreline, the same arguments about the dangers of being cut off by the tide could be made in any number of locations (including at the public access at the Shorelands roundabout) and other public beaches, but it does not		

	prevent public access being implemented. Visitors to the coast always have to some personal responsibility for their own safety, and appropriate signage could also be considered to increase public awareness of the risks. Those with properties on the shore side of the street are able to access the shore and concerns are not being raised about their safety.		

	They are privileged to have properties adjoining the beach, but that should not mean that other people who do not have that privilege should be prevented from accessing the shore. Finally, there is an argument to be made that allowing public access would increase safety on that area of shoreline, as there is evidence that some		

	people already access that area through derelict properties or via a longer walk from public access at Trooperslane (for those more able), or even all the way along the rocky shoreline from Shorelands. Introducing safe public access at Jointure Bay would prevent trespassing on derelict properties, and would also improve accessibility		

	for those who are less able to access the shoreline from the existing access points at Trooperslane and Shorelands.		

Yes	The Council was set up to provide "vibrant, healthy, prosperous, safe and sustainable communities" . I can't think of a better way to do this by opening up public access to Jointure Bay. Access to the shore will encourage people to go out walking and undoubtedly boost their well being and mental health as a result. It is such a shame that an area full of beauty	N/A - there would be no impact on the environment. Opening access to the bay would increase accessibility. There are no safety concerns, it is no different to the public having access to the shore at Loughshore or Hazel Bank.	There shouldn't need to be a public consultation in the first place given NI Water and several other residents along the stretch of road have blocked public access to the shore. The council have failed to maintain the rights of way and should immediately resolve the issue of Juncture Bay. It was widely reported the the council previously refused to pay NI Water £1 for access. Given the cost is now reported to be £10,000, it would seem wise that the council act now before the price increases further.

	and wild life is locked away behind a gate. Many people currently scale the gate and fences in place or cut through derelict property to access the shore, this in itself is a health and safety risk and one that could be quickly resolved if people could freely walk to the shore. In a time where rates bills continue to increase and services get reduced, this is a very		

	easy win for a large portion of tax payers in the Greenisland area and would be very well received in the community. Do the right thing and give us access.		

Yes	I like to walk on the beach but the closest access is approx a 20 min walk. I believe that in the past there were other access points to the beach but property owners selfishly erected gates and prevented and discouraged people from using these access points. We are encouraged to take more exercise for the benefit of our physical and	n/a	

	mental health. A walk on the beach which is on our doorstep is much better than on the busy roads or having to drive somewhere. The beach belongs to us all so it should be as accessible as possible.		

Yes	1-I love the beach, but I don't like having to walk almost 15-20 mins to the nearest access point. 2- It would open up that stretch of beach to more people, encouraging more people to use it instead of having that area blocked off with no access. 3- The shore road has had an increase in foot traffic since the bypass, connecting to point 2, potentially some of that foot traffic	The only concern that I have is how the access would be maintained.	

	may use the beach.		

Yes	There always was access to the shore at 77 Shore Road. When a new house was built at the shore end of the lane, over the years the access was blocked by a gate. Access at the end of Island Park has also been blocked. These two "rights of way" are the only access points to get to the island at low tide.	No concerns	I would be in favour of an access being made available at 103 Shore road.

Yes	For an area named after the green island just off the coast it is a shame that 99 % of the community that live here do not have direct access to this area. I believe that the public should have reasonable access available to the beach. With no access currently between shorelands and troopers lane this leaves a large section inaccessible to many. This is a natural	No concerns	No.

	resource and should be available to all who live in the community.		

Yes	I live across the road from Jointure Bay. I feel it is unfair that we do not have access to Jointure Bay, a natural beauty spot where the sea meets the land and an area where birds life is very active. This is right on my door step and I know I would love to be able to walk across the road and take a stroll along Jointure Bay, appreciating what nature has freely given to us.	No concerns. People would be inclined to pick up rubbish.	Is the reason for the restricted access to do with the Rates? Do the people on the shore side of the road pay higher amounts of Rates than we who live across the road? It is very unjust if we pay the same amount of Rates and yet Jointure Bay is not accessible to all who live in this area.

Yes	I think people deserve access to the beach. So long as it’s not invading the residents privacy who live down there, I feel people should be able to access the beach there.	N/a	

Yes	As a local resident and having moved to the area to be close to the sea we were very disappointed when we leaned that very near hand rights of way to the shore had been systematic blocked over a period of several years. We currently access Jointure Bay at low tide multiple times per week. Current acces routes involve good will of our neighbours	Not Applicable	

	on the shore side or potentially trespassing on land via unsafe routes. The bay and wider shore are beautiful and a safe route to access should be available to all.		

Yes	It is disgraceful that we live in the shore and cannot access the sea due to selfish people illegally closing off public access	N/A	Please act now. You have been dragging your heels for too long

Yes	Closer walk to beach would be nicer, 40 minutes walk isn't too handy and a shorter walk would be better for bringing kids out	N/A	Dog poo litterers on the shore road is ridiculous

Yes	We are keen open water swimmers and regular beach users. We would like access to our own beach at Greenisland. This has been denied to us by residents along the shore at Greenisland for too long. The beach belongs to everyone and we should have easy access.	nothing, i want the access opened	Residents have been blocking access areas that are not owned by them and making it impossible to access the beach. This should be stopped as a matter of urgency as we would use the beach regularly for our own health & mental health reasons. The sooner the access is opened the better. The beach is a fantastic area and should be shared.

Yes	Walking, access, nature		

Yes	It’s a shame that a resource with such recreational and educational potential is closed off to the public. Unbelievably, children can grow up in this area beside Belfast Lough barely knowing that Jointure Bay exists or ever having had a clear view of the island that Greenisland is named after.	No concerns.	No

Yes	We enjoy walking as a family and have often said it would be brilliant if it was made possible to walk or cycle from Carrickfergus to Belfast along the shoreline, not only for residents in the area but for visiters and tourists. It might also encourage more people to walk or cycle as they would feel safer away from such a busy road. We often walk around the harbour area in	N/A	Brilliant idea, hope work can begin sooner rather than later. Would be a real boost to the area.

	Carrickfergus and from Greenisland to Whiteabbey, or Whiteabbey to Belfast, and if the shoreline was opened up more this would be terrific as its great to walk beside the water, when you can hear the water and breath fresher air. Its much more relaxing and de-stressing to walk along the shore rather than on the footpath beside the road,		

	especially as the road is very busy and thus quite noisy - safer too. The traffic on the roads has increased in the area over the years, as the population has increased and there's been a flurry of house building. and with the new carriageway the traffic is often travelling faster. People would be breathing fresher air if they could walk along more of the shoreline.		

Yes	Good to enjoy open spaces Access to beach is a good resource Interesting local history Beach, sea and air promotes better and good mental and physical health	Possible Parking issues for residents in the local area. Possible Increase of traffic	

Yes	I want my children to be able to enjoy the public beach, it belongs to the people, and it's a shame we leave withing walking distance and they haven't even seen Greenisland.	None	

Yes	Has concerns about ASB but believes everyone should be able to access the foreshore.		

Yes	Access to the beach so close to my apartment would great for leisure. The proposed entrance down to the beach I do not think would cause any issues for anyone currently living here. From what I can tell it will not encroach on any residents property. Currently access to this part of the beach is limited only to people who own property right on the	N/A	N/A

	coast. Other residents would have to walk ~15mins in either direction from where I am to get onto the beach.		

Yes	I have lived in Greenisland for many years and haven't been able to cross the road and walk along the beach for the fear that I was trespassing on someones land. It would be nice if a clearly defined access path was there for people in the area to use. Living in an apartment its nice to be able to access public outdoor areas for recreational purposes.	I don't have any concerns regarding safety or environmental impact.	

Yes	The shore is effectively a public good and should be treated as such. Maps and historic maps show there were several public rights of ways along this part of the road which have all been closed probably not following an official and correct process. Several, appear to have been just commandeered by neighboring properties. This leaves no access	n/a	As I mentioned in my answer to question 1, I believe this location is not the only access point which has been closed and potentially not following the correct procedure. I would strongly encourage the Council, once they have reopened this one, to investigate the other closures and where things have been done inappropriately also rectify those.

	between the bottom of Trooperlane and Shorelands which is along stretch for no access particularly for residents who may wish to see or visit the actual Greenisland. I would suspect there has been considerable liberties taken by some which the council can now rectify.		

Yes	I grew up in the house I now live in. As a child there used to be access to the bay and have fond memories. It is currently blocked off creating a private bay for some residents which is unfair. Access should be a right for everyone.	N/A	

Yes	Has limitied mobility and the boulders at Trooperslane make it difficult to walk on the beach		

Yes	I have two dogs and they love the beach, it's such a lovely bit of coastline to walk them safely I also swim and do a lot of paddle boarding and would love to access the water without getting in the car	N/a	There seems to be a very negative attitude from the seaside residents of the old shore road towards the residents on the other side getting access to the beach, as if they own it, this is an extremely unfair and snobby attitude which needs to be broken, the beach should be enjoyed by all who want to take in it's beauty

Yes	The beach is a public place and so should be available to access by the public. We have two dogs who love to go for walks on the beach, which is a much safer place to walk them than on the road. It isn't fair that certain people are able to access the beach just because of the location of their house. It should be accessible for all, especially for those who	No concerns	

	live in the local area and wish to enjoy the natural beauty of the area they live in.		

Yes	I do not think the area in question would be suitable for extra traffic which the opening access would attract and believe the access should be for local residents, there used to be access to the foreshore which has been closed off by the residents who reside close to it.	This part of the road is not appropriate for extra traffic parking.	When I purchased my property I was told there was access to the foreshore .

Yes	Would like closer access to the foreshore for walking		

Yes	It is opposite my house and I've seen how lovely the beach is at low tide, you can walk all the way to Hazelbank. There are a lot of residents in the area that have campaigned for many years to have a local access point to the foreshore. Many right of ways have been gated and locked by the homeowners beside them so although I live 100yards from the shore I have to walk more	indeed the ramp to access the beach from the path can be difficult to navigate and there is a steep bank on one side but minor repairs and railings would make it far safer. Even as it is at the moment and how its been over the past 10 years there have been no accidents or issues that I've been made aware of and I used to walk it every day with my dog while he was still alive.	There is a risk of being cut off by the tide while walking in the bay. its is incredibly shallow and flat so within the space of ten minutes you can find that you have been completely cut off from where you entered the bay if not using a route through 103a/b. The fact that the town is named after an island that many don't even know is there due to a single gate fascinates me. there is a large area opposite the gate where picnic tables could be placed and the road is wide enough to facilitate parking potentially making this area a picnic stop off at the beginning of the causeway coast and what a beautiful start it would be if access to the best beach in the area was there.

	than a mile to get the area I see out my front window. Before the derelict site at 103B was purchased and gated, everyone accessed jointure bay through it and there were no issues, in fact it was lovely to meet your neighbours and chat on a walk together. since 103a purchased their property they have chained boarded up and fenced any access		

	points, yelled at anyone who dared walk by and even pointed their hose soaking them. This has lead to a toxic atmosphere in the neighbourhood and if there was a permanent access point enforced by the council I feel relationships can be mended and people in the area can live happier and healthier lives by being more outdoors without fear of reprisals.		

	We all know how important being in nature can be for good mental health and to have that put beyond reasonable walking distance for many elderly people in the area is quite tragic. one gate is all that stands between them having to walk along a heavily polluted road and the serenity of a beautiful beach.		

Yes	living at my address i can simple access the beach from just crossing the road, at this moment time i have to access the beach from troopers lane which is around 1/2 mile away	n/a	during lock down i was out of work for 40 weeks as i couldn't open my barber shop and this was causing me to walk up and down my street I've lived on for 25 yrs with no access to the beach

Yes	well if i want to access the beach i have to walk about 1/2 mile before i can access the each, while simply i could just cross the road as the access is there.	n/a	its going to be a great thing for us all in our community being one with nature is the best thing against mental health issues with everything that is going on today families facing many day to day life events

Yes	Convenient access to the scenic recreational space at Jointure Bay, with its wonderful wildlife and historic surroundings, would greatly benefit my health and sense of well-being. I also want to enjoy/share this environment with my family, grandchildren, friends and their pets. As a resident living directly across the Shore Road	My answer is not "no"	Council have long-recognised the need for general public access to the Jointure Bay region: - As far back as 1988, Carrickfergus Council recommended that a laneway at 87a Shore Road be asserted as a PROW. However, as Council never fully completed the assertion process (i.e. the PROW was never registered with the Land & Property Service) this PROW was never established. - In a Council-supported "Greenisland Development Framework 2015" consultation, "weakness number 8" identified "limited access to the coast" in the Jointure Bay region. Furthermore, despite: - Council recognising the above need for general public access - Council's awareness that public access to Jointure Bay aligned with their own Health & Wellbeing Policy -Council's awareness, over the past 5 years, of a widely-supported, local "Share the Shore" campaign seeking access to the Jointure Bay region

	from Jointure Bay, I strongly believe that I have an equal right to convenient access to the beach as those residents have on the shore-side of the road. There is currently no officially available, general public access to the beach at Lower Greenisland for a 1.5 mile stretch of the Shore Road, between "The Gut" public right of way		- Council commissioning a Habitat Risk Assessment, which concluded that increased public footfall at Jointure Bay (if general public access was granted) would have no impact on any of the wildlife species listed as using the area - Council possessing "Compulsory Powers for Creation", under Article 12 of the "Access to the Countryside (NI) Order 1983", to create a PROW Council have, to date, failed to create/provide general public access to the Jointure Bay region. NOTE: For many years, prior to the "Share the Shore" campaign, general public access to the beach at Jointure Bay was available via the direlect site at 103 Shore Road (before this site was sold and access closed off). This route involved the use of part of the NIW laneway to gain beach access. During this lengthy period of access, there was no anti-social behaviour, or indeed any objections from shore-side residents or NIW. Lastly, NIW have for years operated (and continue to operate) a discriminatory

	(PROW) beside 29, Shore Road and opposite Trooperslane . If the NIW laneway were to be opened for general public access, I could walk onto the beach 150m away. Whereas, a return journey to Jointure Bay via "The Gut" or opposite Trooperslane , would involve a 3 mile round trip. This journey would also involve		practice of permitting / tolerating access to their laneway by lane-side residents, whilst denying access by the general public. This disgraceful inequality of access / maladministration must be terminated, at long last, by Council taking action to open the laneway.

	negotiating significant obstacles such as lengths of broken pipework and slippery rocky outcrops. It would also involve exposure to the risk of being cut-off by an incoming tide.		

Yes	Always had access whole time lived here. Should be for public and not used as a private beach.	No	No

Yes	I would like to be able to access the bay to simply walk and enjoy the beauty of nature and tranquillity. I used to be able to access Jointure bay along with all other residents and there was never any issue around crime or anti social behaviour which I know is one of the reasons that some residents on the shore side are using to object to access for all residents.	N/A	We should not be treated differently as we along with those other residents pay rates and contribute to the wellbeing of the area. To deny access to some residents, but allow other residents access is fundamentally wrong. I do appreciate that residents on the shore side are concerned about privacy etc, but we are also entitled to access jointure bay to also enjoy privacy and a peaceful environment. In fact when there was a petition raised regarding building apartments in a vacant field just off jointure bay, myself along with other residents signed the petition and also wrote letters to East Antrim council to show our reasons for not allowing planning for apartments. All residents worked together to petition the planning of these. Therefore I cannot understand why some of those residents on the shore side are asking that we access is prohibited to us residents who do not reside on the shore side.

Yes	We have been denied access to jointure bay for some years now; however when we did enjoy access I would do a litter collection all along the bay and residents were appreciative of this. Since not having access then we can no longer enjoy the beauty of the environment and the wildlife. When I moved to Greenisland there was open access and I cannot	N/A	There is also a safety risk involved whereby people have found themselves stranded with the tide coming in and they are unable to vacate the beach at jointure bay and cannot go any further due to risk of drowning. The idea that if access is allowed that anti social behaviour is potential risk is nonsense. This is a very quiet residential road and all residents are respectful of the area and also of their neighbours, but to deny access to some people because they don't live on the shore side is morally wrong.

	understand why this has been denied. I feel that access would benefit my mental and physical health and in turn cleaning they bay improves the environment.		

Yes	It would be nice to have a good place to go walk to, as well as that it may help grow businesses around the shore	N/a	N/a

Yes	It is a great place to go for a walk, run and don’t have to drive far to enjoy a beautiful beach.	N/a	N/a

Yes	It is a magical bit of shore line and it is not fair that people a ross the street have seen every access cut off over the years. As my in laws got older, access to the lane across the way from them got closed and the waste ground got barricaded. We have been complaining for years but i am afraid my father in law passed away without being able to gaze over jointure bay	No. Opening the gate for pedestrians only is fine. People were using the lane for years. And blocking the lane is not stopping able body people from accessing their shore… it is stopping more frail people from enjoying the view of the sea that they could have there.	Just open the gate. Don't make it more visible than it is. If there is signage, it should be something something about respecting the wild life in the area and maybe warning to watch out for tide times as the corner gets cut off. But just let people access the lane without having to trespass under the gate of the vacant plot next to it.

	one last time. People on the land side of the shore road just want access to the shore. The only way now is much further down at the gutt and unless you are a brisk walker and have checked the tide properly you are unlikely to make it all the way to another access point (the beach before carrick) without getting cut off by the sea. All that is		

	required is pedestrian access for the local community. Not something that will encourage visibility, extra traffic etc. It is a very calm secluded area with a lot of amazing birds and nesting species. A public Park type setting would endanger the wildlife in the area and would change the whole feel of the place. All that is required is to		

	open the gate!		

Yes	As a dog owner this would be a perfect walking location for me as there currently aren't any nearby without having to drive to Loughshore/ Hazelbank and add to the traffic congestion in Whiteabbey.	N/a	

Yes	I have a small dog who loves the beach but isn’t great at particularly long walks and it is the only real access point that he could actively reach on foot and still be energetic for exploring	N/A	I do not see a safety issue as it is no different to any other access point along the length of the shore road. I also don’t believe it would be an enviromental risk as the road itself is one of the cleanest kept roads I’ve ever lived on, with little foot traffic barring the local conscientious community.

Yes	For exercise and to enjoy the shore		

Yes	H&WB, Exercise, social meeting, very angry it isn't open		

Yes	Many residents like me enjoy walking the foreshore. At the present time the only way to get to the bay legally requires hazardous and inconvenient passage along the dual carriageway and around the strand in front of the water treatment plant. The tide can be quite unpredictable and I have seen many recourse to clambering around the	I do not have any concerns.	No further information

	edge of the wired fence. This does not appear terribly fair or supportive of elderly residents or those with mobility issues or disabilities The bypass has now created a wonderful opportunity to attract visitors who are interested in nature and the environment to park safely on the broad road and access through the proposed access point.		

	It is also obvious that local people very much respect the foreshore and many volunteer in litter picking and preservation activities. Access at other sites has not had a negative impact on the environment. The benefits of encouraging exercise and the positive mental health effects of enjoying this beach would appear significant		

	and the passage route suggested is quite short - therefore I would assess that the business case for this project would very much weigh in favour of the principles of Managing Public Money NI: a small public investment for a significant benefit. The success of other projects at Hazelbank and Jordanstown are clear and with modest		

	but tangible opportunities for the local economy and business. It is clear that local residents enjoy walking and this would be a great development which would not be wasted. There are not any other immediate open spaces in this particular parish and this would help reduce additional car travel to the available areas. Though not		

	long resident I understand there were historical rights of access for many of the properties on which ground my apartment sits.		

Yes	To enhance our small community lifestyle.	n/a	n/a

Yes	To enjoy the beach	Y	

Yes	Freedom to walk along the public beech and enjoy the views. It's my right.	Nothing.	

Yes	It would be nice to be able to access the shore front easily again considering I live across the road. I am a retired fit individual living on my own who enjoys the outdoors and I find having to walk as I do not drive, further afield to enjoy the shore front ridiculous when it is literally in front of my nose. If this proposal goes ahead, I will	N/A	This form mentions providing additional access. There is no access. In the past, I was able to walk down Island Park, opposite my property, but over the years a locked gate along with fencing has gone up which meant only those residents with a key have access to Jointure Bay. It is unreasonable that some residents have access to Jointure Bay and I along with many of my neighbours on the land side cannot. An open, accessible walkway on the proposed site to Jointure Bay is an equivalent, safe and reasonable way to put an end to this ongoing issue. NB This online form has been completed for two properties. Please count accordingly. 198 Shore Road, where I reside, and 200 Shore Road owned by myself and my siblings. Regards Gillian Boyd

	be able to enjoy once again this peaceful space. It makes perfect sense for a safe walkway to be made available for those in the area and beyond to enjoy.		

Yes	Being so close to the shore, it’s a shame we can’t access it for nice walks, especially in this weather. It would be so handy as it’s just across the street for me and feels nice and safe to walk there on my own.	No concerns. I believe it would remain a quiet place for the locals on the street to enjoy the local beauty	I would like to ask about recycling at Bayview apartments along the front. We have our own black bins and some shared brown bins for food waste but not general recycling. I often save up cardboard and glass and bring them to the dump myself but would be good to have better recycling facilities at home.

Yes	I would be able to access the beach for dog walking, paddleboarding and swimming. This would also help with my mental health and my neighbours.	I have no concerns	I am upset with how long and drawn out this process has been and the behaviour of NI water.

Yes	This will be beneficial to the residents of this area of the Shore Road and give access for dogs/ walkers in the area. My family always had access to the beach here. I was very disappointed when I moved here that there was no access to the sea/ beach that I can see from my home.	NOT APPLICABLE	I feel the Council should open the road and it should be open to the public as an equal right to those of us in the original properties to the opposite side of the road to the beach/ seafront.

Yes	I have lived at this house for 45 years. The gate in question used to be open and I and my children used regularly. I like to go for walks with my grandchildren along the beach. Would love the access to jointure bay to be open again. I'm now retired and like to go for walks.Hope you will see the advantage it would be for people old and young in	I have no objection to it not being open	

	the area thanks John		

Yes	There is access to the beach at Shorelands and then no other until Troopers Lane. It would make the beach more accessible to far more people which would be good in the summer time especially.	I have no concerns about this infact mu answer is all for it.	

Yes	Because the beach belongs to everyone and it's a sound matter of principal that everyone living in the area should have easy access to it. There's a blocked off access point next to where I live due to an illegally erected gate and the inaction from the council on this matter has been a disgrace. I can get down to the beach no problem due to the kindness of		As mentioned, I have a folder of clippings that's documented this matter over the past thirty years orso… if anyone is interested… though the info will be readily available in the local newspaper archives.

	another neighbour but there are people living in this area who think they're above the law and they've been allowed to get their way… I have a folder of newspaper cuttings bequeathed to me by a previous owner of this house that shows this debate has rumbled on for years and nothings been done about it. I don't believe this time will		

	be any different.		

Yes	I live right on the shore road and am denied access to the beach by the owners of the large houses that sit on the shoreline. This is not right, as the beach belongs to noone and should be shared as a recreation space. I also like to swim in the sea and this access would give me the ability to swim nearer to home.	i have no concerns	Owners of the large properties have blocked up access points to the beach and it makes public access for this public recreation space impossible.

Yes	I see no reason to bar the public from having access to this public area.	N/a	Safety signage warning of need to be aware of tides would be appropriate

Yes	I loved paddling on our beach when I was younger. I do not understand why, in recent times, the access points have been closed, particularly given the risks caused by the tides. The beach is an asset for the health and well-being of all in our local community and should be safe and accessible to all residents of the area.	I do not have any concerns about re-establishing access. The current situation is unsafe and discriminatory to residents.	We love the Green Island and are very proud of our beautiful shoreline and surrounding area. Please allow the next generation the same opportunities we had as children - equality and fairness of shore access for all residents. Please don't let another summer pass without sense prevailing.

Yes	It was formerly a right of way & was unlawfully closed off during road widening	My answer was yes	

Yes	There is access to beach via the slip way beside us and families use it with no problems to us lovely to see people enjoying life on the louh	Let the people use their beach and swim in the lough	

Yes	Because it is an absolute disgrace that there is only 1 access point to the best beach on the north shore of Belfast lough from Shorelands to Seapark roundabout	There are no concerns about this pathway as it is a paved track with good accessibility ,safe parking on a very quiet road. There would be no environmental problems whatsoever.	Please do the correct thing here as it would be a wonderful amenity to have with ample parking nearby. What a wonderful beach to take my grandchildren to which is beside my house.

Yes	Because there is plenty of parking space on the road. Needs access also for prams and wheelchairs.	No other concerns	There has always been access for properties to access the shore in order to maintain the battery wall.

Yes	The Greenisland foreshore is a valuable public amenity to which local people should have access.	I have no concerns my answer is yes!	

Yes	There are so few ways to get down to the shore in that area and I feel this access should definitely be open to pedestrians as it was in the past.	None	

Yes	As a parent of young children who love the sea side and beach, this access would be fantastic for us.	N/a	N/a

Yes	Took grandkids on a beach walk towards Carrickfergus last year. One sprained his ankle. Carried him for ages looking for access to the Shore Road. Eventually got told off for walking through a garden. The "temporary" fence on Island Park is a disgrace	My answer is Yes!	The number of private houses who have blocked old alleyways to the beach is totally unacceptable

Yes	I believe public should have access to all NI foreshores	N/A	

Yes	Sea and beach are my place to keep me calm and take my dog. At moment I can only access it at the ' gut' but apart from seaweed covered rocks on which I have slipped on many times, there are parts here where tide comes in quicker than the island park area. I have found myself wading through thigh high water and trespassing on property where people	If environmental impact is of concern should we then close forests, cliff walks and other open spaces? People like myself have been accessing this beach for a long time by climbing over fences, walls and slippery rocks so by opening an area for us to go to the beach can only be the safer option surely??	

	were kind enough to let me cut through. I am in my 70s and am scared that one day a slip on the rocks could end my chances of walking the beach, I don't want it to come to that when a beach is for everybody to enjoy. Thank you		

Yes	At the moment my only access to the beach is at the gut and tide has to be fully out otherwise I have to climb over seaweed covered rocks to reach the lovely white sand.....I am a certain age and left my rock climbing in Portstewart. Walking along the beach is of immense health benefits, the sound of the waves and smell of the sea release happy	My only concern is that it will remain the same and nobody will be able to enjoy it. It is there for everybody, so please make it available to everybody.	This the the first time I have ever encountered a situation where the public are unable to enjoy a beach because there is no access.....please change this.

	endorphins of which many of us need. My dog can run free and play with other dogs, no anger issues from any of them. It's such a shame it's a stone's throw and we can only look at it. The tide at this part of shore road comes in very quickly, in fact I have found myself on more than one occasion wading through water up to my knees. Having to ask kind owners who live on shore side if I		

	could cut through their property, then having to cross dual carriageway totally wet.....not ideal situation to find oneself in! This year so far I gave managed to walk twice on the beach. It would be wonderful for people such as myself who really benefit walking on the beach if there was access for us,our families and pets. People who enjoy these type of		

	walks respect nature.		

Yes	Access to the foreshore is normally available throughout the UK. It is an important point that the area between high and low tide should be accessible to everyone. The access at Greenisland is below that which most reasonable people would expect	The safety consideration can be addressed through common sense design of the access. Ie fences The accessibility issue can also be addressed by design of route, access points and common sense. I do not see an environmental issue here but the location of the access point would naturally restrict the numbers as most people would choose locations which have dedicated car parking and amenities	

Yes	The public rights of way have been shut off. There used to be an access lane but someone put a gate up and cut off the public right of way. I would like to exercise and walk the dog on the beach with family and friends.	N/A	I do not think public rights of way should be taken away by home owners who do not like them

Yes	Everyone is entitled to access to the shore	N/a	

Yes	For recreation, leisure, health and safety and moral reasons. We all should have right of access to the shore.	N/A	The denial of access to the shore at this site has gone on far too long and the council have not done enough to protect the public's right of way. It's about time the council acted for the good of everyone.

Yes	ease of access for the community through a public right of way difficult otherise to access the bay particularly wheb not low tide.	nor applic	no

Yes	Love the beach and sending time outside with family. This is right on my doorstep. And would save on having to drive to a beach. Why have something and not utilise it.	N/a	Environmental impact? If there are plenty of bins provided im sure people will use them. Less impact in my case as I can walk to it.

Yes	The public should have access to nature	N/a	

Yes	Access for walks	No	No

Yes	This was always an access point to the shore. The closing of this public right of way was a great shock to me when it happened. I can guess the houses close by would rather local people didn't have access. It gives them a private shore and therefore increases the value of their homes. Thereby depriving the people in the local area from accessing the beach and the water.	I have no safety concerns. I walk this road 4 times a week and the road is very wide and has almost no traffic.it is virtually a cul de sac in terms of traffic. There are pedestrian crossings at the Seapark end which I never need to use.	This is not an area where lots of people will flock to. The little bit of beach at the bottom of Tooperslane is never busy despite also being close to Carrickfergus. I can't see why there would be a larger amount of people accessing the shore at this point. However, for the people who live in Greenisland it would be wonderful to be able to access the shore without having to walk a further mile to Trooperslane. In addition the main Shore Road is extremely wide with little to no traffic, positioned as it is between two roundabouts which avoid the dual carriageway therefore providing safe access at both ends.

	I’m so glad the legality of this decision is being questioned. It is a great area for birdwatching and frequently has a group of seals on the rocks. How lovely it would be to see them from the beach and not over the fence.		

Yes	At present the properties along that part of the shore effectively have private beach access. All local residents should have access to our public land and assets.	N-a	No

Yes	It would be lovely to be able to walk	None	

Yes	Safe and easy access	Na	

Yes	This is a beautiful beach and a place to go and rest. Recovery and relax. It’s good for mental health and work life balance. I believe it is our right to have access.	N/a	No

Yes	No	No	No

Yes	I often drive to Portmuck or Brown's Bay to paddleboard in the evenings, something more local would be much better and safer, means we could get out earlier in the evening and be in earlier.	N/a	

Yes	Be good for my mental health and safer than walking down to loughshore	.	

Yes	To be able to enjoy the beautiful environment in which we live	N/A	

Yes	It would be perfect to take the grandchildren down onto the beach at low tide to look at the sea life that exists on the Lough	My answer is yes	It’s time the path was open to local people to enjoy the shoreline at Greenisland

Yes	I walk my dog every day and it would be great to be able to get down to the shore that way instead of having to walk to almost magowan tyres	N/A	N/A

Yes	I have a very big interest in photography and I regularly walk or cycle from Greenisland to Trooperslane beach to take photos of the sunrise or sunset and surrounding areas. I have walked past the gate for many years now and have always thought of how many amazing photos I would get if I had access to that part of the beach. If people have doubts about	If the gates are open to the public I propose proper signage goes up eg. Warning about tides, be respectful of neighbours and nature etc	

	others coming and destroying the beach or leaving rubbish behind I propose a trial run of opening the gates for 3 months to see how it goes and if the outcome is positive then it should be open all year round.		

Yes	I love our shoreline	Not applicable	

Yes	I struggle with walking longer distances so this would help greatly	N/A	

Yes	My son loves the beach, and would be so handy to access it further up from loughshore as I'm not a confident at parking and most of the time the car park is busy. Plus it can be a nightmare to get out of. If we had access here it would mean we could walk to the beach instead of drive.	N/a	

Yes	The foreshore should be open to the public,not blocked off.	My answer isn't no	

Yes	ease of use	safety aspect	

Yes	As a child/ teenager we were able to access the beach via that access point, as in turn were my own children. But then someone/ neighbouring homeowner/ etc, blocked off the entrance and no-one knew who actually owned it, whether it was private property, public property or actually a right of way. If we as ratepayers, have been denied access to a public beach	N/A	

	due to someone's selfishness, it needs to be addressed asap.		

Yes	Keen walker and we are always along the shoreline, would be a great benefit for everyone	none	We need more access areas, esp with so much mental health issues these days, more places to roam is needed.

Yes	It is the only access to the beach in the area and it would be a great place to walk all year round. I regularly walk in the area and it would be nice to make use of the surroundings we are lucky to have locally.	N/A	

Yes	I love taking my kids and Dog onto the beaches, it would be great to have another local beach to walk to.	N/A	

Yes	Because it is a beautiful spot and everyone should have access to appreciate it	No	

Yes	I have lived here and only been on beach once !! It’s a disgrace as a swimmer I have to drive further to swim and the walk woukd be lovely to do close by	None	Please let residents used the beach as it’s a sin we not allowed

Yes	I think it would be lovely to have access to the shore in my own area. As it stands I need to go to Loughshore, Hazelbank or Carrick. It seems senseless that the only people allowed access are the home owners.	I have no concerns ... other than a niggling worry that some young folk may use it as a drinking spot. Antisocial behaviour can be an issue throughout Greenisland unfortunately.	

Yes	The is a beautiful area of Greenisland and to deny access to it seems unfair.	None	

Yes	Encourage me to stay on my doorstep for walking rather than travelling to other places	Nil	

Yes	Access to the beach and water	N/A	Allowing this would benefit the residents of Greenisland as Newtownabbey, Whiteabbey, Jordanstown and Carrickfergus residents all have access and Greenisland residents have been denied access.

Yes	Closure than loughshore and hopefully quieter for residents in peak times.	N/A	

Yes	I think it is a natural attribute of the area that is underused due to lack of easy access especially for the older generation.	My answer is yes	I hope if access is opened up that it is made safe to use for all and that adequate seating is made available

Yes	Access to the shore is great for wellbeing physical and mental health.	No objections	

Yes	To allow me and my family to walk the shore	N/a	N/a

Yes	Nice to walk on the beach with family.	N/a	N/a

Yes	Somewhere to walk and enjoy locally.	N/a	N/a

Yes	Another place for walking and recreation	No	No

Yes	To provide public access to this section of beach	I have no concerns	Public access to beaches is important especially where access is so limited for people in Greenisland

Yes	It should be open for the public to enjoy the bay and use it. It should not be just used for rich people to do what they want. Also why is there an example about what to say if the answer is no but no suggestion if the answer is yes?	There should be accessibility for the public to have access for emergencies.	

Yes	Beaches provide free, open-air space for exercise, stress relief, and family activities. As greenisland has become more crowded, the beach is a welcome natural retreat vital for mental and physical well-being, especially for those without private outdoor space. Denying access benefits a privileged few at the expense of	N/A	

	the broader community.		

Yes	I am a walker and have frequently been caught out at high tide making the beach a dangerous place to go. I believe everyone should have access to the beach which for too long has been only accessible to those that live there. It is a natural resource that everyone should be able to go to should they wish.	I have no concerns	

Yes	A hidden gem in greenisland to enjoy a little peace	None	

Yes	Open space to walk and enjoy nature with the children and the dog	N/a	

Yes	All local residents should be able to access this beautiful part of our local area.	No concerns	

Yes	Family should be able to have safe access to the beach	N/a	

Yes	Until recently there was a public right of way on to the beach. The beach is the property of everyone in the area.	NA	

Yes	Would be lovely to have use of this space and enjoy the walks and views	N/a	N/a

Yes	Public spaces should be open to the public	N/A	

Yes	It’s a public space so the public should have access to it.	No concerns	

Yes	I go for walk every night but I can not access the sea. Living close to shore but not able to enjoy fully the seaside. It feels unfair that only home owners can access this bay.	No.	

Yes	To open up the beach walk and prevent having to drive to Jordanstown Loughshore for beach access.	N/A	

Yes	A fantastic area of nature on our doorstep, that we should be able to access safely.	N/A	

Yes	It’s a public beach and public right of way. Improvement of physical and mental health	I have no concerns	No

Yes	Access to the foreshore is very limited and would be a fantastic asset to residents of Greenisland	N/A	

Yes	It would allow peaceful exercise on daily walk in nice quiet area for people of all ages.	none	

Yes	Beach is accessible at Carrickfergus and Whiteabbey but is difficult to access in between. This would provide additional access for recreation and tidy up a neglected area.	N/A	

Yes	I often access the beach from Shorelands at low tide and love to run up and down it towards Carrickfergus . It is a beautiful piece of coastline and importantly it means I get to run from home (so decreasing my car use) while breathing in sea air rather than car fumes running alongside the shore road! However, on a couple of occasions I have got wet feet as the	N/A as my answer is yes	N/A

	tide has started coming back on before I have got back to Shorelands. An additional access point would encourage me to exercise on the beach now as I would know I had a safe exit point if the tide started coming in.		

Yes	More access points to the beach increases opportunities to use our fabulous shoreline	N/a	

Yes	I have attempted to reach this beach via the ramp at the roundabout near Shorelands, it proved very difficult and I was unable to. The tide must also be fully out, and if it comes in while you are there you are limited with ways to make your way back. I have young children and there would be no way they could make it across the rocks using route from	N/A	I am happy to be contacted again about this if needed

	the ramp at the Shorelands roundabout, I would love to have a safe and easy accessible route to the beach to take them there and enjoy a beach so close to their house		

Yes	It’s a beautiful beach and we can access it from across the road at Shorelands Roundsbout. Would be fab to be able to walk along the beach to this spot (which we do often) and return to the road to walk back. Also I know many residents from the old shore road desperately want access to the beach again.	Please allow access to the beach.	

Yes	Health Beauty We’re entitled to it Makes sense	None	No

Yes	Great place to swim that is safe and close to home. Minimal environmental impact if it is pedestrian-only access.	My answer was yes!	

Yes	The coast should belong to all	N/a	

Yes	Access to the shore for recreation and photos	N/a	

Yes	Easy and safe access to this area will enhance the lives of locals by allowing them to enjoy the benefits of such a beautiful environment. Our entire family from grandparents (my husband and I) to grandchildren thoroughly enjoy walking and being in nature. This location is ideal. How could it be right to deny access when the benefits are so obvious? The	The access should of course be safe.	

	alternatives require transport by car which seems against all current environmental advice.		

Yes	My daughter and her family (grandchildren) live very close to this area and as my wife and I look after them they like nothing better on a nice day (and sometimes a not so nice day) to go to the beach. Lough shore is a bit of a walk -too far for them so we have to drive literally past this particular access area- hardly environment ally friendly. Opening same would be such an	Not applicable	Access to the beach amenity should be cherished and encouraged by all government departments not closed off to the public. What message does this send to the children of today/adults of tomorrow?

	opportunity on their doorstep to explore nature and provide us oldies with a nearby valuable access point. Please reconsider this decision to close access.		

Yes	When I lived in Greenisland it was very frustrating as you had a beautiful coastline and also a beautiful hillside but with no access to neither. I used to walk around the gap to the left to access the beach and get glared at by residents who believed it was a private beach. It's not. Everyone should have access to the coast, especially	N/A	I hope this goes ahead. It was raised in a council consultation years ago but nothing was done about it.

	families, who need open spaces for their children to run. There's also risk of getting stuck at high tide. I think North Downs coastal path is to be appreciated. You can walk for miles along the coast.		

Yes	I enjoy access to this beach and I believe we should be able to continue to enjoy. The beach is public and we need multiple access points in case the tide comes in.	No	No

Yes	Potential for sea swimming	Na	

Yes	To access the sea to swim	Nothing of concern	

Yes	It's a safe, quiet little beach and we used to take the children there when they were small, now it's inaccessible. The beach should be available to the public and NOT treated as a private beach by the well off residents who are lucky enough to be able to afford to live along that stretch of the coast. They bought their houses knowing that the beach was publicly	I have no concerns, only a concern that the public are being blocked from a public space	It's a disgrace that the access ways have been blocked. I would be interested to know if this was sanctioned by the council, what applications were submitted and if not what the council has done about.

	accessible, so it should not be annexed. There were no safety, accessibility or environmental issues raised in any of the 50 years that I have lived in the area, so using these as reasons to block pedestrian access is invalid.		

Yes	The bay and foreshore should be available to the public and not closed off by private housing.	Na	

Yes	When visiting my friend who lives there I look forward to enjoying this beautiful beach that should be accessible to all.	None	

Yes	I believe it would be of benefit to local people and add to the enjoyment of the coastal area.	N /A	N/A

Yes	Often walk in the area and would like to have access to the shoreline	N/a	

Yes	I have friends who live in the area and for mental health reasons, the bay would be a great area for them to walk and swim.	No concerns	The bay should be open to everyone who lives there not just the select few along the front.

Yes	I believe that the council has failed to keep a public right of way open in this area. We have plenty of old slip ways that had been in use years ago but they have been failed to be maintained and kept open to public. A house is built down one lane with a private property now and gated across with no beach access too old slipway. I have a dog who loves the beach in	I don't have an concerns with beach access as plenty of houses and new build houses / apartments advertise with beach access, I see many families from the houses along the shore taking their children out digging in the sand enjoying it with their dogs. If it was such a concern about waste it should be completely closed off the the public I really think its an excuse for the shore access to exclusively to themselves . The council really needs to open this up I have heard stories from local residents how we used to have bathing pools open and a park down at the big house where children used to come and play and bathe. It should be a beach for everyone not a select few. You only need to look across the water and see how well they have kept their access open to beach at Cultra etc..	

	Greenisland and I have to say along the whole shore in my area the part that is closed off is the nicest part especially when the tide is out on a nice summers day. I have plenty of pictures of my dog enjoying the restricted part of beach. Getting too the beach is challenging especially when the tide is in and needing to walk to Hartley Hall slipway then		

	needing to navigate the rocky terrain just to get to the nice part of the beach. The tide has to be so far out just to get access so its limiting and with my older parents its really had to get them down onto the nicest part of the beach due to no access all I can do is send them nice pictures. I myself will get older someday and I want to make it easier to have access to the beach when I am		

	older making it safer to get onto the beach for everyone and other generations with something to be proud of.		

Yes	Increased ability for exercise. Allow open passage for local residents and increase travel boosting local economy. Increasing help with mental health and possible places to travel safely away from cars. Increased push to increase exercise and out door activity. Could be a	Safety of not permitting a pedestrian access is more dangerous. The environmental impact as with the roads nearby. Which are clean due to bins placed at acceptable impacts.	

	benefit for elderly to access the beach without walking to far. Increase safety when on beach to reduce possible injury or death from residents and travelers. Due to the tied while acress is still and will always be permitted for residents bay the beach.		

Yes	It would allow access for local residents. It is a beautiful stretch of beach. I access it via the slipway at Hartley Hall however this is not accessible for everyone and can be dangerous if the tide changes. Access here would be safer for local residents. The beach is mainly used by dog walkers.	NA	

Yes	Access to the beach for locals	N_a	

Yes	It is much needed to have access to the foreshore. It belongs to us all and to be deprived of this is unfair on us all. Why should it not be accessible..?	Na	Open this up please!!

Yes	Nobody should own or block access to the water we all share.	N/A	N/A

Yes	Increases the amenity in the area , encourage local residents to live healthier lifestyles with access to our beaches, there are other access points ear Jordanstown and greenisland that cause no issues and I feel this new addition to the public access in this area would also benefit the local community .	No negatives I can think of	Na

Yes	Would be really nice to make use of the beautiful walk along the shore we have on our doorstep. Great for the surrounding home owners mental health and wellbeing.	Na	Na

Yes	This beach should be available for public use. A beautiful natural resource, excellent for health purposes, both mental and physical. Currently completely wasted. Many people in Greenisland would love to see this available for walks.	No concerns	

Yes	We can currently enter at the shore area at the roundabout at Shorelands, however a walk involves risking the tide times as there is nowhere to exit at Island Park or nearby. This is extremely dangerous as the tides come in quickly and there is nowhere to shelter or climb to safety. Also, the shore does not belong to those with private	.	.

	access and it is unfair and dangerous that gates remain locked preventing public access on public owned land.		

Yes	It would give access to a new area for walking with the kids and the dog. We don’t have a close access to the beach other than the Loughshore park	N/A	There should be some supervision of the access as we don’t want to encourage antisocial behavior

Yes	You can walk to Jordenstown from Greenisland but not the other way towards Carrickfergus	None	Start it asap

Yes	Would love to access this area for walks and to enjoy the sea and beach	.	It would be a real benefit to the area to see the beach at Trooperslane tidied up and the overgrown area cut back and maintained. This is a great space for outdoor walking etc and it’s a good lead round to Greenisland via the beach. The whole shore area of Carrickfe RV is needs more care and attention from the council

Yes	Outdoor exercise is of proven benefit to physical and mental health. Walking and paddling on our beach is the perfect antidote to stress, and allows us to fill up our lungs with fresh sea air, while getting as energetic (or not) as we wish. It's available to all ages and abilities, provided the tide and the weather are right. At present, all access	NA	NA

	points to and from the beach are blocked along a distance of over 2km from Shorelands ("The Gut") to Torytown (Trooperslane). There are several tidal pinchpoints along this stretch, meaning that people who start out walking from one direction risk being cut off by the tide. This is an unacceptable situation, and in addition to the basic public safety		

	aspects, places the Council in a position of liability, should anything happen to anyone venturing along the beach who is not familiar with the tides. An access point close to Jointure Bay or Island Park would considerably mitigate this risk, as well as permit regular safety assessments by Council personnel. It is not at all		

	likely that re-opening access to the beach will cause a large influx of people. A recent Habitat Regulations Assessment carried out for the Department of Infrastructure, looking at potential impact on birds on the Green Island concluded that there would not be any adverse environmental impact of opening access. We would argue that, on the contrary,		

	opening access would be beneficial, since residents have an interest in protecting their environment, and would be motivated to organise beach clean-ups, birdwatching trips and other activities that will preserve, protect and enhance the shore, without generally incurring any cost to Council. If anyone were to potentially		

	harm our environment, this would be rapidly detected, reported and mitigated - which cannot happen reliably if access continues to be blocked. There are several anecdotal examples of chemical spills, dead birds, pipe overflows, even boat beachings that have been detected and reported by members of the public accessing the beach. Yet our		

	environment is healthy and beautiful - this stretch of shore is enjoyed by many species of birds, including waders, divers, gulls, egrets, heron, merganser, geese. And then there are the seals - you can frequently see them either swimming in the water off the Green Island or lounging on the rocks off the point at Seapark. Humans and wildlife can and should		

	co-exist. Since the Pandemic we have all recognised the importance of coming together as a community to get to know each other, to help each other, to make Greenisland somewhere we can be proud of, whether we live on the Shore Road, the Top Road or off the Station Road. The beach is a perfect place for people to see		

	each other in a relaxed, informal surrounding, and really appreciate where we live. Access to the beach also helps us look out for our neighbours, and considerably reduce the risks of crime or antisocial behaviour. But it's more than that. The Green Island gives our village its name - it is by definition an indispensable part of our townscape character, and the shore		

	should be accessible to everyone. There is also the issue of basic rights. This beach is owned by the Council between the high and low mean tidal reaches from Shorelands to Kilroot. We the residents are ratepayers to Mid & East Antrim Borough Council. It is a violation both of our rights under the Access to the Countryside Order 1983.		

Yes	It will be easier for me to go for a walk with my dog	-	

Yes	The beach is a public amenity. It must be accessible by the general public. To be honest this shouldn't even be a question. It is so obviously the right thing to do.	/	In fact there should be more access points opened up in the Greenisland area, not just this one. One is needed around the bottom of the Station Road.

Yes	Safer and less congestion.	Safety and Health reasons	Yes all people need a healthy place to relax for health sake. Somewhere safe to relax and walk as encouraged to do so by medics to loose weight and gain general fitness and I do not think people should be deprived of taking advantage and relaxing in a healthy area. Why not. You cannot deprive people of this safe healthy space . We all have the rite to live a healthy life as well as others.

Yes	It would be great for the local community to go for a walk which is very nearby	N/A	

Yes	Safety- it is easy to get caught by the tides when walking along the foreshore and access to main road at as many points as possible will reduce the risk. Local residents should be able to benefit from local recreational grounds like the foreshore.	Na	Na

Yes	Not enough of the shoreline is accessible	My answer is yes	

Yes	Walking my dogs	None	

Yes	I walk along that road frequently and take my young niece to the beach further along. It would be lovely and safer to have access to the water there further away from the busy road	N/A	

Yes	Just the beauty to walk near such a beautiful spot	No concerns	

Yes	Because this is a local amenity that is under utilised. Opened, it will enhance the lives and wellbeing of people	Not applicable. As with the access granted to locals in Jordanstown, the Greenisland access will be fulfillng	

Yes	Greenisland is an up and coming area but lacks any safe areas to walk. I have young children and the top road is seriously dangerous to traffic. We've already had a dog killed while walking on this road whilst on the lead. A safe area to walk our dogs and for my children to play would be amazing for the local area. Other areas similar have excellent options like hazelbank,	N/A	None

	loughshore, 3 mile water, bashford forest etc etc. Greenisland has nothing of this nature and it really lets the area down. I would strongly plead for you to take this opportunity!		

Yes	It’s unbelievable that there is no direct access to water or a beach in the whole of Greenisland. Would be a great spot to bring children or dogs and generally speaking an additional spot to enjoy Greenisland when the weather is nice	NA	

Yes	A lovely beach should be available to all residents	No concerns	

Yes	The beach should be allowed to be used by everyone...not for a few people...	None	

Yes	Able to walk to see, have small child and it will improve quality of life	N/A	N/A

Yes	Because we used to have access to the beach right up until the new housing went up, and it’s not fair that we’ve to walk the entire station and shore road to get to the beach only a few streets away as the crow flies.	I’d hope it would be made accessible for all!	It’s not giving something brand new, it’s simply giving us access Back.

Yes	Great idea for walking etc	Na	

Yes	It would be nice to be able to walk from our door to the shore instead of taking the car to Loughshore. My little one love the beach so we would definitely be in favour	N/a	N/a

Yes	Because we should be able to access the beach and walk along like we used to. It’s a shame such scenic walks are being prevented.	.	

Yes	I fully support the opening of access to Jointure Bay and the beach area. I have lived in the Carrickfergus and Greenisland area all my life. I have lived close to Jointure Bay for the past 25 years with my family. I spend a lot of time outdoors with my family, as it is so good for my mental wellbeing. This area is called Greenisland. The island that gives it	I have no objection to access to the shore being opened. I am perplexed as to why it is taking so long to come to this stage.	There has been a discrepancy in this area for some time. It is not fair that some people have ready access to what amounts to a private beach, and the rest of us only have access if we take a serious risk to our safety with rising tides and no way of egress. I am a local ratepayer and feel it is about time the council listens to ALL parties involved and addresses this issue in a fair and balanced way that results in a satisfactory conclusion.

	its name is only accessible at great personal risk. There is a beautiful and diverse ecosystem on our shore, with seals and seabirds in abundance. A walk on the shore in this area can be so beneficial to anyone, both physically and mentally. It has always upset me that access to the shore has been so restricted between Trooperslane and the gut.		

	Anyone using the shore at low tide is at risk of being cut off by rising water. There is no way to escape the tide for almost 2 km. This alone, in my view, is enough to warrant opening access.		

Yes	Close proximity to home address, beautiful walks without having to walk up to trooperslane alongside a busy dual carriageway. Also have an older dog who can't walk as far as she used to so would be great to have beach access for her	No concerns	

Yes	Gives all residents the opportunity to use a public beach more accessibly. The beach and sea should be enjoyed by all who want to in the area, the number of people who currently live on the road is not a large amount that increase in foot traffic should become a major concern. Currently others have to walk to loughsgore or trooperslane to access a	No concerns	

	beach, I personally use a paddle board and it would be nice to not have to hike it a mile or two down the road.		

Yes	We are so fortunate to live so close to such a beautiful area of natural beauty and not having safe legal access is not only dangerous but such an awful shame not to be able to share it and have equal access as some of our neighbours do. I suffer from poor mental and physical health at times and this would be a wonderful preventative option for	X	

	me. Our dog Sunny would love a safe natural space to exercise a healthier option than the main roads around us.		

Yes	Much more convenient and beneficial to everyone in the community	N/A	N/A

Yes	As a resident here it is a shame that access to the beach directly across from my house has been made inaccessible. If I was fortunate to live on the other side of the road the luxury of private access to the beach through the property is not fair or just to all residents. There is a public access route directly across from my house that the resident had	The safety & environmental impact should be commensurate to the issues relating to the small beach access on the Carrick side of the Waterworks. There is vehicle access to that beach which is a far great impact than a pedestrian only access at Jointure Bay.	Please consider the fairness of refusing access to the shore to all & yet permitting access to a small number of homes. It cannot be argued it's unsafe to access & use the beach anymore than any other stretch of tidal water. Nor can it be ruled unsafe to access & use the beach but exempt the homeowners that have private.

	blocked access to & I believe years ago it was fully accessible to all. I hope that shore will accessible to all. I am a sea swimmer & would love to have access to the beach that is on my doorstep.		

Yes	Every resident on the part of the shore rd beside the proposed gates reopening is entitled to equal right of access to the beach in the same way as residents in island park and other houses selected by gate key owners on the road who have been given unexplainable key access. I used to walk this beach and live opposite another right of access and evidenced	Accessibility	This draconian and unfair access process has dragged on for far too long and is totally unacceptable in today's openness transparent and fairness approach which is government policy

	this. This is totally unacceptable in today's equal opportunity requirements An equality impact assessment should have been conducted		

Yes	It is well known the benefits of exercise in nature on physical and mental health. It would be so beneficial to resident's physical health and mental health if we had access to walks along the shore, as we did years ago. Also, if high tide comes in, it would be helpful to have more access points where people can get off the beach. It really would be wonderful to	No concerns	It would be wonderful if the council could open this access again. We are paying over £3k in rates to live in a 3 bedroom house across the road from the shore - it would be nice to feel that we are getting something more than our bins emptied for what we are paying!

	be able to go for beach walks with my children, just by walking across the road - why on earth would this resource not be made available?! Beaches do not belong to the home owners along the shore, they are public assets and should be easily accessible and shared with all residents. It is a pedestrian only access, with only buses for public transport, so		

	it is highly unlikely there will be hundreds of people descending as they do in County Down beaches on a sunny days - just as they don't descend on the beach access at Shorelands either, so that argument against it should be null and void. Again, using Shorelands access as an example, they have no issues with safety or environment al impact. There is		

	strong community support for this access being opened, and as such the council does have a duty to respond to constituents' interests and rights.		

Yes	I live a 2 minute walk from the right of way in question however to access the beach I currently have to walk all the way to trooperslane or down to Shorelands, 15 minutes either way. I have a young daughter and the ability to simply walk down to the beach from my street would be a massive improvement to our quality of life. It also seems hugely obtuse of whatever	None	

	body is restricting access, be it NI water or the council. The water pump that it's claimed requires spiked fencing to protect it is just daft, its 50m down the current lane and off the beach, the path could be modified to lead straight to the sand and nobody would be anywhere near the pump. This is a great opportunity for the council to do something		

	positive and provide a real service to the hefty rate payers of greenisland, this opportunity should not be missed.		

Yes	As an above resident of the Shore Road, Greenisland we believe that it is outrageous that where once there was public access has been blocked with no clear reason. We are nature loving and appreciating neighbours, we have no intention on damaging our own neighbourhood. We only want to go to the beach??? Why not?? Our current access is unsafe and dangerous,	Not applicable	This is a very small ask council, not having access pushes people out of this area.

	people are accessing over damaged gates, someone will get hurt!!! We only want to share our beautiful shore. Please grant us access so we can enjoy the beautiful beach.		

Yes	It's a public beach, should be public	None there's not that many people who love on the road	No

Yes	I live just over the road. It'd be nice to be able to walk down there and easily access the sea.	n/a	

Yes	I like going to the beach for walks and swimming and it's frustrating that we can see the beach from the apartment but don't have a close access point.	Na	

Yes	I believe it will be a benefit to the whole community while I also believe it is a disgrace that there currently is no access	N/a	N/a

Yes	I live here by the sea and can't get access even though I have an OG house. Also why shouldn't everyone enjoy it?!	It can be maintained easily	

Yes	Why not, there is no justifiable reason to prevent people from enjoying our coast line. People living on the shoreline do not own the beach nor the lough I would however strongly recommend that tide tables are posted on the entrance	No concerns	

Yes	The bay is a public amenity of great value to many. Simple, easy access to all residents and visitors should be available.	No concerns.	Thank you for addressing this long standing matter.

Yes	For years, the lack of access at this point along the beach has been a practical nuisance. When walking along the shore, especially from the Jordanstown or Carrickfergus side, there's no clear or legal way to return to the main road without retracing your steps for a significant distance. This cuts off a natural walking route and disrupts what should	N/A	N/A

	be a continuous and open coastal experience. Like other areas in Jordanstown and Carrickfergus , we should be entitled to fair and reasonable access to the coast and nature. Restricting this access feels unjust and inconsistent with the public's right to enjoy the shoreline		

Yes	It is one of the original access points to the foreshore and the only one easily accessible on foot from the majority of Greenisland. It has been a long established right of way and more recently has been obstructed. The right of way should be asserted and the obstruction should be removed. Whilst access of anybody to anywhere may bring some occasional	In fact, allowing access will positively affect safety, providing a legal egress point for anyone caught out by the tide. It self evidently improves accessibility. By facilitating access by concerned local citizens, the environment of the Lough Shore will be improved due to increased monitoring and actually being valued by people as an asset.	The beach at Greenisland has huge amenity value for the residents. Blocking it off loses the connection of the community to the Lough.

	unsatisfactory issues for some residents, this in no way equates to the enormous loss of amenity and enjoyment provided by access to the beach. The road and foreshore are public access spaces any the link is via a long established public right of way. This should never have been blocked off, and the gate used to block it should have been removed immediately		

	that the council were informed.		

Yes	This was such a sore spot during Covid with the share the shore campaign. You shouldn't need a million pound house to access the water you can see from your bedroom window	It needs to a secure safe path for all seasons ideally with security cameras to ensure there is no antisocial behaviour/littering	I appreciate the locals will worry about footfall/noise/litter/people abusing the luxury but I think it would be so lovely to be able to get down to the water. It would improve the property value of all the locals and it would improve our quality of life more importantly

Yes	Not enough access to the shore, to big a gap between lough shore, Hartley cottage and then not to trooper lane, would be nice to walk along that stretch of beach	Yes	Why can't we have more access. Other side of lough has plenty nice pathways

Yes	I enjoy walking along this part of the coast as I've done for years and it is good for my health and well being.	I believe it's safer to have some for of access for safety sake	No

Yes	Any access should be welcomed. The shoreline belongs to us all not just the fortunate few who can afford luxury houses on the seafront.	.	.

Yes	We need as much excess to the the council owned beach we pay rates , A lot people just like to walk along a beach near their home ,	No	No

Yes	It would be safer to walk younger children down a pedestrian only area & would save in trying to fight against traffic	N/A	

Yes	Always think there should be public access to the beach	None	None

Yes	We should be allowed to walk the beautiful beach	Na	Na

Yes	Good for residents to have access to our local beach	N/A	

Yes	It seems ridiculous that I have to explain this. It should be the opposite way round and the authorities should explain why they have blocked access to the beach. If the authorities state safety as a reason then they are mistaken as anyone now entering the beach from an alternative point risk being trapped by incoming tide. Not to mention the health	.	.

	benefits associated with a pleasant walk with your partner. It's hard to see what harm this would do. Please review the authorities intransigance with this issue and reinstate beach access at this location. Best regards Stephen		

Yes	This would be a lovely resource and a scenic spot. We would certainly use it, if it were opened up. Would be a nice spot for kayaking, stand up paddle boarding, as well as swimming, subject to good water quality. Reasonable steps would need to be taken to mitigate against risks of antisocial behaviour for local residents, however. At the same time, the	As noted above - I could potentially understand concerns of local neighbours who might be immediately adjacent to access points - thinking of issues that have sometimes occurred at popular spots such as Helen's Bay, etc. at the same time, this has never been too much of an issue at Loughshore - which is a pretty spot, but less suitable for swimming	No

	shore should be access for all, not just a fortunate few.		

Yes	Would enhance a walk in the local area.	N/A	

Yes	The shore should be open to everyone not a select few.	N/a	

Yes	There's barely anywhere for families or people in general to walk and enjoy within Greenisland.	N/a	N/a

Yes	We as residents should have full access to this stretch of the lough.	N/A	

Yes	It's vital that the public can access the shore for leisure and we'll being	There is no reason at all for any concerns	Too often the right to access is being withdrawn, look at the other side of the Lough in county down where the foreshore is accessible at dozens of points along the whole coastline, in fact the council maintains a walkway pretty much from Belfast to Donaghadee . Access to the foreshore at county Antrim should be opened up at as many points as possible along Belfast Lough, there should be no part inaccessible with more than a 15 minute walk from a point along the roadway with suitable parking or from a residential area

Yes	This beautiful section of countryside should be enjoyed by all not just a select few	No	No

Yes	This would provide ready access , allowing those local to avail of this beautiful landmark.	no concerns	

Yes	Its important to have safe outdoor areas for people to use (pandemic lockdowns and need for more open air spaces) we need to appreciate our seas/shores and wildlife and help to clean up	I have no concerns	There is much to aid mental health by a leisurely walk along a beach

Yes	To enjoy access to the shore front for walking.	N/a	N/a

Yes	Recreational access, walking my dog, bird watching etc The shoreline should have public access	None	

Yes	Access to the beach for walks and swim.	No concerns	

Yes	We visit my brother in law regularly and often visit the beach. But this entails an unsafe and long walk around with our children just to gain access to the beach.	N/A	N/A

Yes	I frequently visit my family living opposite the proposed opening and are forced to walk a long and unsafe way round have any access to the shore.	Na	None

Yes	The shoreline of this country is for access by all it's citizens	There are NO greater "safety, environmental" associations to access at Jointure Bay than are potential at any other location	It is your role to act as an enabler of rights, particularly those of the Council's residents. There is no reasonable case for the continuation of this deprivation of rights to access public coastline.

Yes	We frequently visit our son's family and the highlights of our visits has always been walking along the shore - the proposed acess which is directly opposite his dwelling. At present we are forced to use a long and unsafe route in order to have any access to the shore.	The prop
